

Project Overview

USDA National Finance Center Modernization Assessment

Background: The U.S. Department of Agriculture's (USDA) National Finance Center (NFC) is an Office of Personnel Management-certified shared service center that provides payroll, human resources management, and financial services. The NFC assists the USDA and other government and quasi-government agencies in achieving cost-effective, standardized, and interoperable solutions that provide the functionality to support those agencies' strategic financial management and human resource management direction. The NFC services more than 170 diverse agencies and provides payroll services to more than 600,000 federal employees. The NFC's core operations are in New Orleans, LA, with additional sites in Washington, DC, and Denver, CO. The NFC's backup facilities are in St. Louis, MO, and Shreveport, LA.

About The National Academy of Public Administration

Chartered by Congress to provide non-partisan expert advice, the Academy is an independent, non-profit, and non-partisan organization established in 1967 to assist government leaders in building more effective, efficient, accountable, and transparent organizations. Learn more at www.napawash.org

More About the Study

Project Description

The USDA NFC requires an assessment of its mission and operations as a shared service provider and its organizational capacity to meet ongoing mission requirements efficiently and effectively going forward. The USDA contracted with the Academy to provide a modernization assessment of the NFC. The Academy will

- Analyze the NFC's governance and finance structures, supporting technology systems and processes, internal organization and infrastructure, and stakeholder engagement;
- Review how the NFC evaluates and benchmarks its service levels and performance;
- Examine how the NFC budgets as a shared service provider—including workload forecasting, capital investment, operations and sustainment, and rate/fee setting—and consider the benefits of alternative funding structures;
- Examine the NFC's collaboration with its stakeholders, including customers, Congress, other USDA components and federal agencies, and the OMB;
- Review the resources needed to support the NFC in its mission delivery; and
- Identify, with NFC, the "desired future state" of the NFC and what supporting functional changes are needed for the NFC to achieve that desired future state.

The Academy has appointed a four-member Panel of Fellows to oversee and guide this study. Information on the Panel of Fellows and Study Team is provided on the next page. A final report with findings and recommendations, and executive briefings on the report, will be completed by May 31, 2023.
