The "Standard Warranty" is part of the warranty protection package available from John Deere Construction & Forestry Company (John Deere Limited in Canada) ("John Deere") to purchasers of new John Deere products ("product"):

STANDARD Warranty is John Deere's standard new product warranty, described in this document, provided at no additional charge to the purchaser.

EXTENDED Warranty is a separate repair contract made available by John Deere for purchasers who wish to complement their Standard Warranty coverage. Complete Extended Warranty details, including coverage options and limitations, are set forth in the Application for Extended Warranty, which is available from authorized John Deere dealers.

STRUCTURAL Warranty applies to certain structural components as listed below and as described in this document.

FACTORY-INSTALLED UNDERCARRIAGE Warranty applies to certain undercarriage components as listed below and as described in this document.

A. STANDARD WARRANTY - GENERAL PROVISIONS

John Deere will repair or replace, at its option, any parts (except those specified below) of a new John Deere product that, as delivered to the original retail purchaser(s), are defective in material or workmanship. Performance of this warranty will be free of charge for parts and labor, except as otherwise stated below. Standard Warranty applies only to purchases from John Deere and authorized John Deere dealers and, except as otherwise provided in the next sentence and section L below, is extended only to the original retail purchaser of the product. Remaining Standard Warranty applicable to a used John Deere product is transferred to a subsequent purchaser of the product only if the subsequent purchaser requests a transfer from an authorized John Deere dealer before the product's Standard Warranty expires. Coverage begins on the date of delivery of the product to the original retail purchaser. For purposes of this warranty, a product that has been rented, used for demonstration purposes for 150 or more hours, or otherwise used prior to its original retail purchase has been "used" for the total duration of such use. Warranty statements required by law covering engine emissions-related parts and components are found on a separate written warranty certificate provided to the purchaser at the time of the original retail purchase.

B. WHAT IS COVERED BY STANDARD WARRANTY

All parts of a new John Deere product (except those noted in Sections D and E below) are covered during the Standard Warranty period set out above.

C. EXCLUSIVE REMEDY

The repair or replacement of covered parts or components that are defective, as provided in Sections A, B, D.2 and D.3 herein, shall be the purchaser's exclusive remedy for any defect in the product. However, if after repeated attempts such repair or replacement fails to correct the performance problem caused by the defect, the purchaser's sole remedy shall be a refund of the amount paid for the product (in exchange for a return of the product), excluding any transportation charges, license fees, taxes and insurance premiums, and less a reasonable allowance for use of the product prior to its return. In no event will the dealer, John Deere or any company affiliated with John Deere be liable for any incidental or consequential damages, including but not limited to loss of profits, rental of substitute equipment or other commercial loss. Correction of defects in the manner provided above shall constitute fulfillment of

all liabilities of the Dealer, John Deere, or any company affiliated with John Deere to the purchaser or any other person, whether based upon contract, tort, strict liability, or otherwise. This limitation does not apply to claims for personal injury.

D. ITEMS COVERED SEPARATELY -

1. Standard Warranty does not apply to batteries, radios, tires, cameras, or to Cummins, MTU or Detroit Diesel Engines installed in John Deere products, which are covered by separate written warranties.
2. Factory-Installed Undercarriage Warranty covers all non-rubberized factory-installed undercarriage wear components for 3 years or 4,000 hours from the date of delivery to the original retail purchaser, whichever occurs first (unless terminated earlier under Section F, below). In addition to the items listed in section E below, Factory-Installed Undercarriage Warranty does not cover: failures due to wear, machine application, maintenance practices, or improper machine configuration; removal and installation labor; transportation or hauling costs; unapproved parts; non-wear items; and rubberized undercarriage components such as rubber tracks. Warranty claims will be pro-rated based upon wear of the failed component and whether track shoe width is approved by John Deere. II. Term of Master Agreement

- 2.1 Initial Term.** The initial term of this Master Agreement is for two years. The term of this Master Agreement may be amended beyond the initial term for 3 additional years at the Lead State's discretion and by mutual agreement and upon review of requirements of Participating Entities, current market conditions, and Contractor performance. The Lead State may, prior to execution, adjust the effective date or duration of the initial term or renewal period of any Master Agreement for the purpose of making the Master Agreement coterminous with others.
- 2.2 Amendment Limitations.** The terms of this Master Agreement will not be waived, altered, modified, supplemented, or amended in any manner whatsoever without prior written agreement of the Lead State and Contractor.
- 2.3 Amendment Term.** The term of the Master Agreement may be amended past the initial term and stated renewal periods for a reasonable period if in the judgment of the Lead State a follow-on competitive procurement will be unavoidably delayed (despite good faith efforts) beyond the planned date of execution of the follow-on master agreement. This subsection will not be deemed to limit the authority of a Lead State under its state law to otherwise negotiate contract extensions.

III. Order of Precedence

- 3.1 Order.** Any Order placed under this Master Agreement will consist of the following documents:
 - 3.1.1** A Participating Entity's Participating Addendum ("PA");
 - 3.1.2** NASPO ValuePoint Master Agreement, including all attachments thereto;

Contractor terms and conditions that apply to this Master Agreement are only those that are expressly accepted by the Lead State and must be in writing and attached to this Master Agreement as an Exhibit or Attachment.
- 3.3 Participating Addenda.** Participating Addenda will not be construed to diminish, modify, or otherwise derogate any provisions in this Master Agreement between the Lead State and Contractor. Participating Addenda will not include a term of agreement that exceeds the term of the Master Agreement.

IV. Participants and Scope

- 4.1 Requirement for a Participating Addendum.** Contractor may not deliver Products under this Master Agreement until a Participating Addendum acceptable to the Participating Entity and Contractor is executed.
- 4.2 Applicability of Master Agreement.** NASPO ValuePoint Master Agreement Terms and Conditions are applicable to any Order by a Participating Entity (and other Purchasing Entities covered by their Participating Addendum), except to the extent altered, modified, supplemented or amended by a Participating Addendum, subject to Section III. For the purposes of illustration and not limitation, this authority may apply to unique delivery and invoicing requirements, confidentiality requirements, defaults on Orders, governing law and venue relating to Orders by a Participating Entity, indemnification, and insurance requirements. Statutory or constitutional requirements relating to availability of funds may require specific language in some Participating Addenda in order to comply with applicable law. The expectation is that these alterations, modifications, supplements, or amendments will be addressed in the Participating Addendum or, with the consent of the Purchasing Entity and Contractor, may be included in the ordering document (*e.g.*, purchase order or contract) used by the Purchasing Entity to place the Order.
- 4.3 Authorized Use.** Use of specific NASPO ValuePoint Master Agreements by state agencies, political subdivisions and other Participating Entities is subject to applicable state law and the approval of the respective State Chief Procurement Official. Issues of interpretation and eligibility for participation are solely within the authority of the respective State Chief Procurement Official.
- 4.4 Obligated Entities.** Obligations under this Master Agreement are limited to those Participating Entities who have signed a Participating Addendum and Purchasing Entities within the scope of those Participating Addenda. States or other entities permitted to participate may use an informal competitive process to determine which Master Agreements to participate in through execution of a Participating Addendum. Participating Entities incur no financial obligations on behalf of other Purchasing Entities.
- 4.5 Notice of Participating Addendum.** Contractor shall email a fully executed PDF copy of each Participating Addendum to pa@naspovaluepoint.org to support documentation of participation and posting in appropriate databases.
- 4.6 Eligibility for a Participating Addendum.** Eligible entities who are not states may under some circumstances sign their own Participating Addendum, subject to the consent of the Chief Procurement Official of the state where the entity is

located. Coordinate requests for such participation through NASPO ValuePoint. Any permission to participate through execution of a Participating Addendum is not a determination that procurement authority exists; the entity must ensure that they have the requisite procurement authority to execute a Participating Addendum.

- 4.7 Prohibition on Resale.** Subject to any specific conditions included in the solicitation or Contractor's proposal as accepted by the Lead State, or as explicitly permitted in a Participating Addendum, Purchasing Entities may not resell Products purchased under this Master Agreement. Absent any such condition or explicit permission, this limitation does not prohibit payments by employees of a Purchasing Entity for Products; sales of Products to the general public as surplus property; and fees associated with inventory transactions with other governmental or nonprofit entities and consistent with a Purchasing Entity's laws and regulations. Any sale or transfer permitted by this subsection must be consistent with license rights granted for use of intellectual property.
- 4.8 Individual Customers.** Except as may otherwise be agreed to by the Purchasing Entity and Contractor, each Purchasing Entity shall follow the terms and conditions of the Master Agreement and applicable Participating Addendum and will have the same rights and responsibilities for their purchases as the Lead State has in the Master Agreement and as the Participating Entity has in the Participating Addendum, including but not limited to any indemnity or right to recover any costs as such right is defined in the Master Agreement and applicable Participating Addendum for their purchases. Each Purchasing Entity will be responsible for its own charges, fees, and liabilities. The Contractor will apply the charges and invoice each Purchasing Entity individually.
- 4.9 Release of Information.** Throughout the duration of this Master Agreement, Contractor must secure from the Lead State prior approval for the release of information that pertains to the potential work or activities covered by the Master Agreement. This limitation does not preclude publication about the award of the Master Agreement or marketing activities consistent with any proposed and accepted marketing plan.
- 4.10 No Representations.** The Contractor shall not make any representations of NASPO ValuePoint, the Lead State, any Participating Entity, or any Purchasing Entity's opinion or position as to the quality or effectiveness of the services that are the subject of this Master Agreement without prior written consent.

V. NASPO ValuePoint Provisions

- 5.1 Applicability.** NASPO ValuePoint is not a party to the Master Agreement. The terms set forth in Section V are for the benefit of NASPO ValuePoint as a third-party beneficiary of this Master Agreement.
- 5.2 Administrative Fees**
 - 5.2.1 NASPO ValuePoint Fee.** Contractor shall pay to NASPO ValuePoint, or its assignee, a NASPO ValuePoint Administrative Fee of one-quarter of one percent (0.25% or 0.0025) no later than sixty (60) days following the end of each calendar quarter. The NASPO ValuePoint Administrative Fee must be submitted quarterly and is based on all sales of products and services under the Master Agreement (less any charges for taxes or shipping). The NASPO ValuePoint Administrative Fee is not negotiable.

This fee is to be included as part of the pricing submitted with a vendor's response to the Lead State's solicitation.

- 5.2.2 State Imposed Fees.** Some states may require an additional fee be paid by Contractor directly to the state on purchases made by Purchasing Entities within that state. For all such requests, the fee rate or amount, payment method, and schedule for such reports and payments will be incorporated into the applicable Participating Addendum. Unless agreed to in writing by the state, Contractor may not adjust the Master Agreement pricing to include the state fee for purchases made by Purchasing Entities within the jurisdiction of the state. No such agreement will affect the NASPO ValuePoint Administrative Fee percentage or the prices paid by Purchasing Entities outside the jurisdiction of the state requesting the additional fee.

This procedure may be modified in Participating Addenda and adapted to the Purchasing Entity’s rules and policies. The Purchasing Entity may in its sole discretion determine which Master Agreement Contractors should be solicited for a quote. The Purchasing Entity may select the quote that it considers most advantageous, cost, and other factors considered.

Any order for less than the specified amount is to be shipped with the freight prepaid and added as a separate item on the invoice. Any portion of an Order to be shipped without transportation charges that is back ordered will be shipped without charge.

 - 12.2.1.4** reasonably expected to be used in combination with the Product.
- 12.2.2** The Indemnified Party shall notify the Contractor within a reasonable time after receiving notice of an Intellectual Property Claim. If the Contractor promptly and reasonably investigates and defends any Intellectual Property Claim, it shall have control over the defense and settlement of the Intellectual Property Claim. However, the Indemnified Party must consent in writing for any money damages or obligations for which it may be responsible.

contract, the Contractor shall seek clarification from the ordering party and/or the Contracting Officer.

D. Delivery on parts is to be made within 30 days or otherwise stated in quotation.

E. One operating manual, an illustrated parts manual or List, and the warranty shall be furnished for each new item purchased, as well as any proprietary tools necessary to perform routine service or adjustments, all at no additional cost.

F. All ordering entities will have the option to pick up their equipment from the dealer.

13. Price Adjustments

The Contract price shall be the most current Contractor's Manufacturer's Suggested Retail Price (MSRP) in effect at the time the order is placed less the discount percentage offered. This allows for market fluctuations to take place while the discount percentage must remain stable.

The Contractor will be required to notify the Contracting Officer (Lead State) for review and approval when new pricing updates occur and an explanation of what has prompted the change as well as documentation to support the price increase. Documentation may include: the manufacturers national price increase announcement letter, a complete and detailed description of what products are increasing and by what percentage, a complete and detailed description of what raw materials and/or other costs have increased and provide proof of increase, index data and other information to support and justify the increase.

The price increase must not produce a higher profit margin than the original contract, and must be accompanied by sufficient documentation and nationwide notice of price adjustment to the published commercial price list.

Price Established at Time of Order. Pricing is established at the time an order is placed by a public entity with the Contractor. No retroactive price increases will be allowed, nor will price increases be allowed at time of delivery.

Price Reductions. In the event of a price decrease in any category of product at any time during the contract in an OEM's published commercial price list, including renewal options, the Lead State shall be notified immediately. All published commercial price list price reductions shall be effective upon the notification provided to the Lead State.

14. New Products

New Products may be added to the awarded categories as they are introduced as long as the products remain within the scope of that category. The quoted discount cannot be lowered throughout the Contract period.

15. Discontinued Products

Contractor is to notify the Contracting Officer of any changes in their schedule of equipment such as discontinued products or replacement models to continue proper presentation on contract award posting.

Request for Proposals for Heavy Construction and Industrial Equipment

Issued by the **State of Oklahoma**
Solicitation Number OK-MA-192-23,

The purpose of this competitive solicitation is to develop a category / catalog discount contract structure to provide for equipment to be made available for purchase. This allows for the most current model of equipment to be covered under this contract as equipment is introduced to stay with available market trends.

The pricing matrix is a percentage discount subtracted from the Contractor's Suggested Retail Price. Contractor can submit actual pricing schedules for their equipment with the percentage discount already figured, as long as the Contractor list price is stated first, then the discount, then the final discount price. If you have products that can be fueled by means other than gas or diesel fuel, and that are considered environmentally friendly, please include them in your response.

The quoted discount percentage will be in affect the entire contract period. Additional or deeper discounts will be accepted, but original discount rates cannot be lowered.

17. Value Added Contract Items

Value Added Items have been included with Attachment I, Cost Proposal, within 2 tables titled:

- I.2 Heavy Equipment Value Add
- I.4 Industrial Equipment Value Add

As a value-added option, vendor may specify contract items which will qualify as priority, bestselling, higher usage items, or a special "hot" list or "contract offering" based on a deeper discount.

Due to the large variance of equipment available, and as the subject expert, the vendor may choose the items to offer.

This product listing will allow the vendor to represent the type, style, quality, and breadth of equipment options available if awarded.

This list will remain firm for the initial base year, with the option to refresh or revise the listing of contract special items on an annual basis at contract renewal periods.

Submission of items will be included in the total value-added scoring evaluation.

Attachment J PROPOSED MODIFICATIONS TO SAMPLE MASTER AGREEMENT

The Lead State may, but is not obligated to, consider proposed modifications to Attachment D, Sample Master Agreement.

Provisions of the Sample Master Agreement that are generally inapplicable to, incompatible with, or unsuitable for the subject of this RFP should be brought to the attention of the Lead State using the process described in this RFP for asking questions and will be addressed only at the sole discretion of the Lead State.

Offeror-specific modifications to the Sample Master Agreement may be proposed as part of Offeror's proposal in this attachment but are **strongly discouraged**. The quantity, breadth, and nature of modifications proposed by Offeror may be considered in the Lead State's evaluation of Offeror's proposal and of its risks, costs, and benefits to the Lead State and potential Participating Entities and Purchasing Entities. Proposing excessive or overly restrictive modifications, or proposing modifications upon which Offeror's proposal is conditioned, may result in Offeror's proposal being deemed non-responsive.

Offeror's Proposed Modifications. (Check one of the below.)

- ☐ Offeror has no proposed modifications to Attachment D, Sample Master Agreement.
- ☒ Offeror proposes the modifications set forth in the table below and **will submit with Offeror's proposal a redlined copy of Attachment D, Sample Master Agreement** incorporating each proposed modification. Offeror understands, acknowledges, and agrees to comply with the following:

Attachment A: RFP Terms & Conditions IV.D.4	4. Offeror's proposed costs must be inclusive of all fees and charges, including but not limited to fees or charges for shipping, delivery, credit card payments, or personnel. All costs proposed by Offeror must also be inclusive of the NASPO ValuePoint administrative fee.	Our proposed costs only include the current base list price, FOB Origin. Freight, PDI, P-Card surcharges, and dealer added items will be a separate line item on the P.O.	This is to ensure that we are offering the best possible discount to each customer no matter where they are located. The weight of our products on contract, total acquisition cost, along with special permitting by state our proposed change is most beneficial to the customer. This is accepted practice on most contracts with this type of equipment.	The risk of not accepting our proposed change would result in a significant discount change as we would have to account for the largest freight cost on all bids to cover our risk. The benefit of accepting this is when freight costs go down due to easing of inflation, will be passed along to the customer.
Attachment B: Scope of Work II.1.C.	These items will hold cost for the first initial period of the contract	Our exception is that our GradeControl Technology value added items in Attachment L are not available as a separate purchase. These items are only available as options when configuring the wholegood machine. The pricing on these would fall under list price discount off of current price.	This is the industry standard practice for pricing these types of options on equipment.	Risk is minimal with the benefits to the customer as an option at machine list price discount.
Attachment B: Scope of Work III.4.C.	Any trade-in allowances determined by the Contractor shall be deducted from the established current price before the discount is applied. The formula will be to deduct the discount	Machines will be fully configured; the discount will then be applied to the fully configured machine. The trade value will then be deducted for the net amount owed by the customer.	This is the industry standard practice for trades within this industry.	Risk is low as the customer is still receiving the discount off of the fully configured machine before figuring in the trade value.

	from the established current price and then take off the trade-in allowance. (Only for those Purchasing Entities allowed to trade-in equipment for new equipment).	Admin fees will be paid on the full machine contract price, not the net after trade.		
Attachment B: Scope of Work III.7.H.	The Contractor shall furnish all necessary supervision, labor, equipment, tools, parts, materials, and supplies needed for the warranty repair work.	Warranty repair work is performed by our independent authorized dealer network. They are fully trained and certified and have all the necessary supervision, labor, equipment, tools, parts, materials, and supplies needed for the warranty repair work.	Dealers will be authorized to sell our products and they will be authorized to service our products.	The benefit is that the dealer networks are closer to the customer location for faster response.
Attachment B: Scope of Work III.7.J.	Equipment that will remain in the Contractor's possession overnight and for extended periods shall be stored in a safe and secure location for protection from theft and environmental dangers. The Contractor shall be responsible for the proper care and custody of any state-owned equipment in the Contractor's possession	Contractors in this sentence will be our independent authorized dealer network, but we will agree to all other provisions. This will be part of our dealer training and certification process for selling on this contract.	Dealers will be authorized to sell our products and they will be authorized to service our products.	Low risk as dealers will be performing all of the service at their locations.
Attachment B: Scope of Work III.8.B.	After Market Repair parts must be equal to or exceed Contractor's original equipment manufacturer's specifications. Repair parts must be packaged and distributed under their respective nationally known name brands.	Any warranty work conducted will use authorized John Deere parts from our parts network (per our warranty statement). Any work outside of warranty using aftermarket parts would only be considered if requested by the customer but would be discouraged.	John Deere has an industry leading warranty policy that covers this topic.	Low risk, more beneficial for the customer because they are working with the local dealer.

Attachment B: Scope of Work III.9.	Contractor is required to provide any buy-back, trade-in, or exchange policy concerning repair parts sold to Purchasing Entities. Contractor shall correct ordering errors without further cost to the ordering entity. A copy of the Warranty shall be included for replacement parts purchased.	Warranty is handled by our independent authorized dealers.	John Deere has an industry leading warranty policy that covers this topic.	Low risk, more beneficial for the customer because they are working with the local dealer.
Attachment B: Scope of Work III.11.	A. Freight from the factory to the distributor is the responsibility of the Contractor. Freight from the distributor to the customer is an allowable charge. B. Delivery is to be FOB Destination (of ordering entity) freight collect C. Any Freight, shipping and handling costs and set-up fees paid by the ordering entity are to be annotated on the quote/invoice as a separate line item .	Our price pages are current base list price, FOB Destination, with freight as a separate line item. All freight is to be paid by the customer and will be annotated on the quote as a separate line item. This ensures we are providing the best discount possible to the customer.	Freight and shipping charges and PDI are varying based on the customer location. This allows for a better discount to all customers eliminating freight as a variable.	Benefits of this is that customers in closer proximity to the shipping factory aren't paying the same freight costs as customers that are farther away. The risk is that if freight is included within our pricing all customers would be offered a lowered discount to offset any freight cost risk.
Attachment B: Scope of Work III.12.A.	It is preferable to expect delivery within 120 calendar days after receipt of order unless other arrangements are made between the ordering party and the Contractor due to current market status.	We will do everything we can to provide the fastest delivery possible after receipt of PO. Current lead times due to demand and supply constraints may take longer than 120 calendar days to deliver. Customer will be notified of expected lead time prior to acceptance of purchase order.	With current demand and supply chain constraints we want to make the customers aware of extended lead times.	Open communication.

Liability for product delivery remains with the Contractor until delivered and accepted.	Delivery will be made by our independent local dealer. Arrangements for acceptance will be made by our independent local dealer.	This is clarification that dealers will be an authorized selling agent.	Customers can work directly with their local dealer.
Attachment B: Scope of Work III.12.E.	One operating manual, an illustrated parts manual or List, and the warranty shall be furnished for each new item purchased, as well as any proprietary tools necessary to perform routine service or adjustments, all at no additional cost.	Each machine is delivered with an operator's manual. Our warranty statement is available as part of this contract submission and is available to all customers. Parts catalogs can be purchased on our website. No proprietary tools are necessary if routine service is defined as daily inspections and oil/filter changes.	This is accepted as standard industry practice.	Benefits would be a faster response time that allows to real time communication of part number changes. This is communicated electronically to our dealers.
Attachment B: Scope of Work III.13.	The price increase must not produce a higher profit margin than the original contract, and must be accompanied by sufficient documentation and nationwide notice of price adjustment to the published commercial price list.	Our pricing is market based as well as impacts of inflation on cost of manufacturing (i.e.: cost of steel, cost of tires, etc.). We send notification to our dealer network of pending price increases at least 30 days in advance.	Industry standard practice for pricing construction equipment.	Allows for all OEMs to react to cost changes.
Attachment B: Scope of Work III.13.	Price Established at Time of Order. Pricing is established at the time an order is placed by a public entity with the Contractor. No retroactive price increases will be allowed, nor will price increases be allowed at time of delivery.	We will guarantee the price on a quote if a PO is received within 30 days.	Our quote and PO process gives customers confidence of a price for 30 days.	Confidence to customer of price required to purchase a machine.

Section 3 - Discount % Off Evaluation
Heavy Construction Equipment

ADDITIONAL INSTRUCTION:
1. Offeror must complete all required fields (fields in a blue highlight) on this Cost Proposal. The format and structure of the Cost Proposal is intended to allow for a fair discount % off type evaluation of like costs among Offerors. Deviation from the format or structure of this Cost Proposal may result in Offeror's proposal being deemed non-responsive.
2. It has been determined that the best pricing structure for this portion of the evaluation is a simple "percentage off" of the most current dated Supplier's suggested government or commercial catalog or price list. The pricing matrix is a percentage off the Supplier's Suggested Retail Price. Suppliers can submit actual pricing schedules for their equipment though, with the percentage discount already figured, as long as the Supplier list price is stated first, then the discount, then the final discount price. You will have to keep it updated as pricing changes occur.
3. Within the tables, if you have different discounts for different brands / models / sizes of equipment or options, you WILL have to list the items. If you need more space, insert additional lines as necessary. Light blue highlighted cells signify a requested vendor input.

Attachment I
COST PROPOSAL
Section 3 - Discount % Off Evaluation
Industrial Equipment

ADDITIONAL INSTRUCTION:

1. Offeror must complete all required fields (fields in a **blue** highlight) on this Cost Proposal. The format and structure of the Cost Proposal is intended to allow for a fair discount % off type evaluation of like costs among Offerors. Deviation from the format or structure of this Cost Proposal may result in Offeror's proposal being deemed non-responsive.

2. It has been determined that the best pricing structure for this portion of the evaluation is a simple "percentage off" of the most current dated Supplier's suggested government or commercial catalog or price list. The pricing matrix is a percentage off the Supplier's Suggested Retail Price. Suppliers can submit actual pricing schedules for their equipment though, with the percentage discount already figured, as long as the Supplier list price is stated first, then the discount, then the final discount price. You will have to keep it updated as pricing changes occur.

3. Within the tables, if you have different discounts for different brands / models / sizes of equipment or options, you WILL have to list the items. If you need more space, insert additional lines as necessary. Light blue highlighted cells signify a requested vendor input.
