

FINISHED VEHICLE AND AUTO PART LOGISTICS

THE NORTHWEST SEAPORT ALLIANCE HAS WHAT IT TAKES
TO HANDLE YOUR AUTO SUPPLY CHAIN NEEDS

Marshall Avenue Auto Facility

Taylor Way Auto Facility

Whether finished vehicles or auto parts, we have the facilities, connections, and experience to ensure safe, reliable, and efficient movement of your cargo through the port and on to its destination.

Facilities to Suit Your Changing Needs

Choose from two state-of-the-art, full-service auto processing facilities, both dual-rail served. Multiple piers are available for vehicle offloading minimizing berthing conflicts, and first point-of-rest yards are located nearby.

Ready to Grow Your Business

Over 250 dedicated acres for vehicle processing activities, with expansion opportunities. Auto shipments are handled at three port-operated berths with additional berth space available.

Better Connected, Better Served

We offer multiple Ro/Ro and liner connections with major ports in the key global auto markets. Our facilities are located on the rail mainline, and within a short distance of interstate highways for over-the-road shipments.

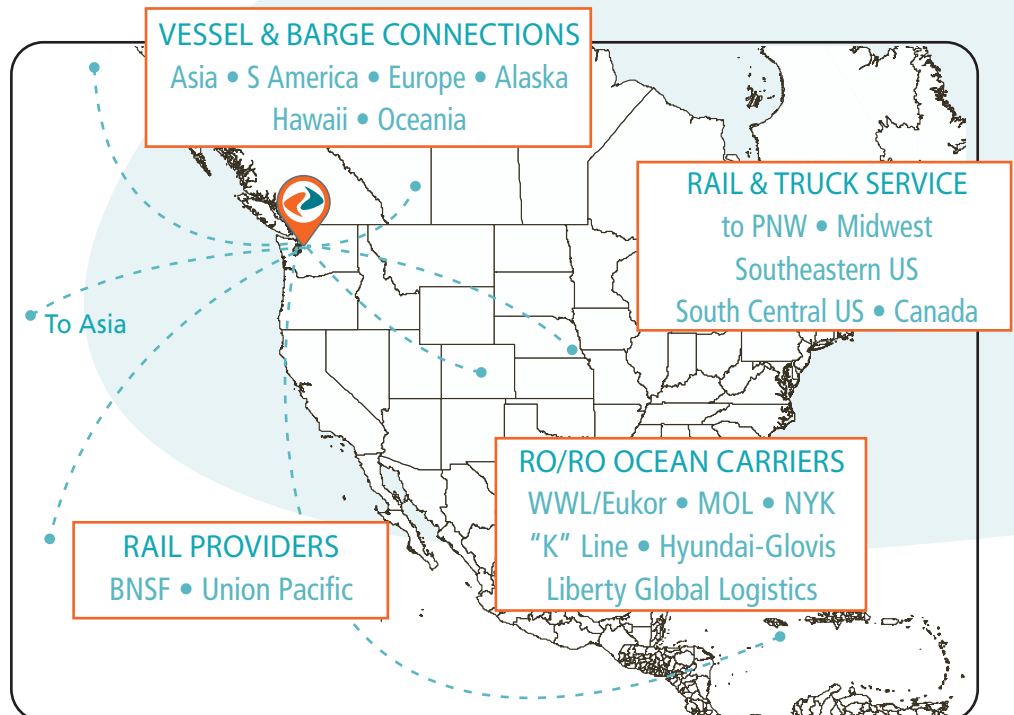

Your Cargo is in Good Hands

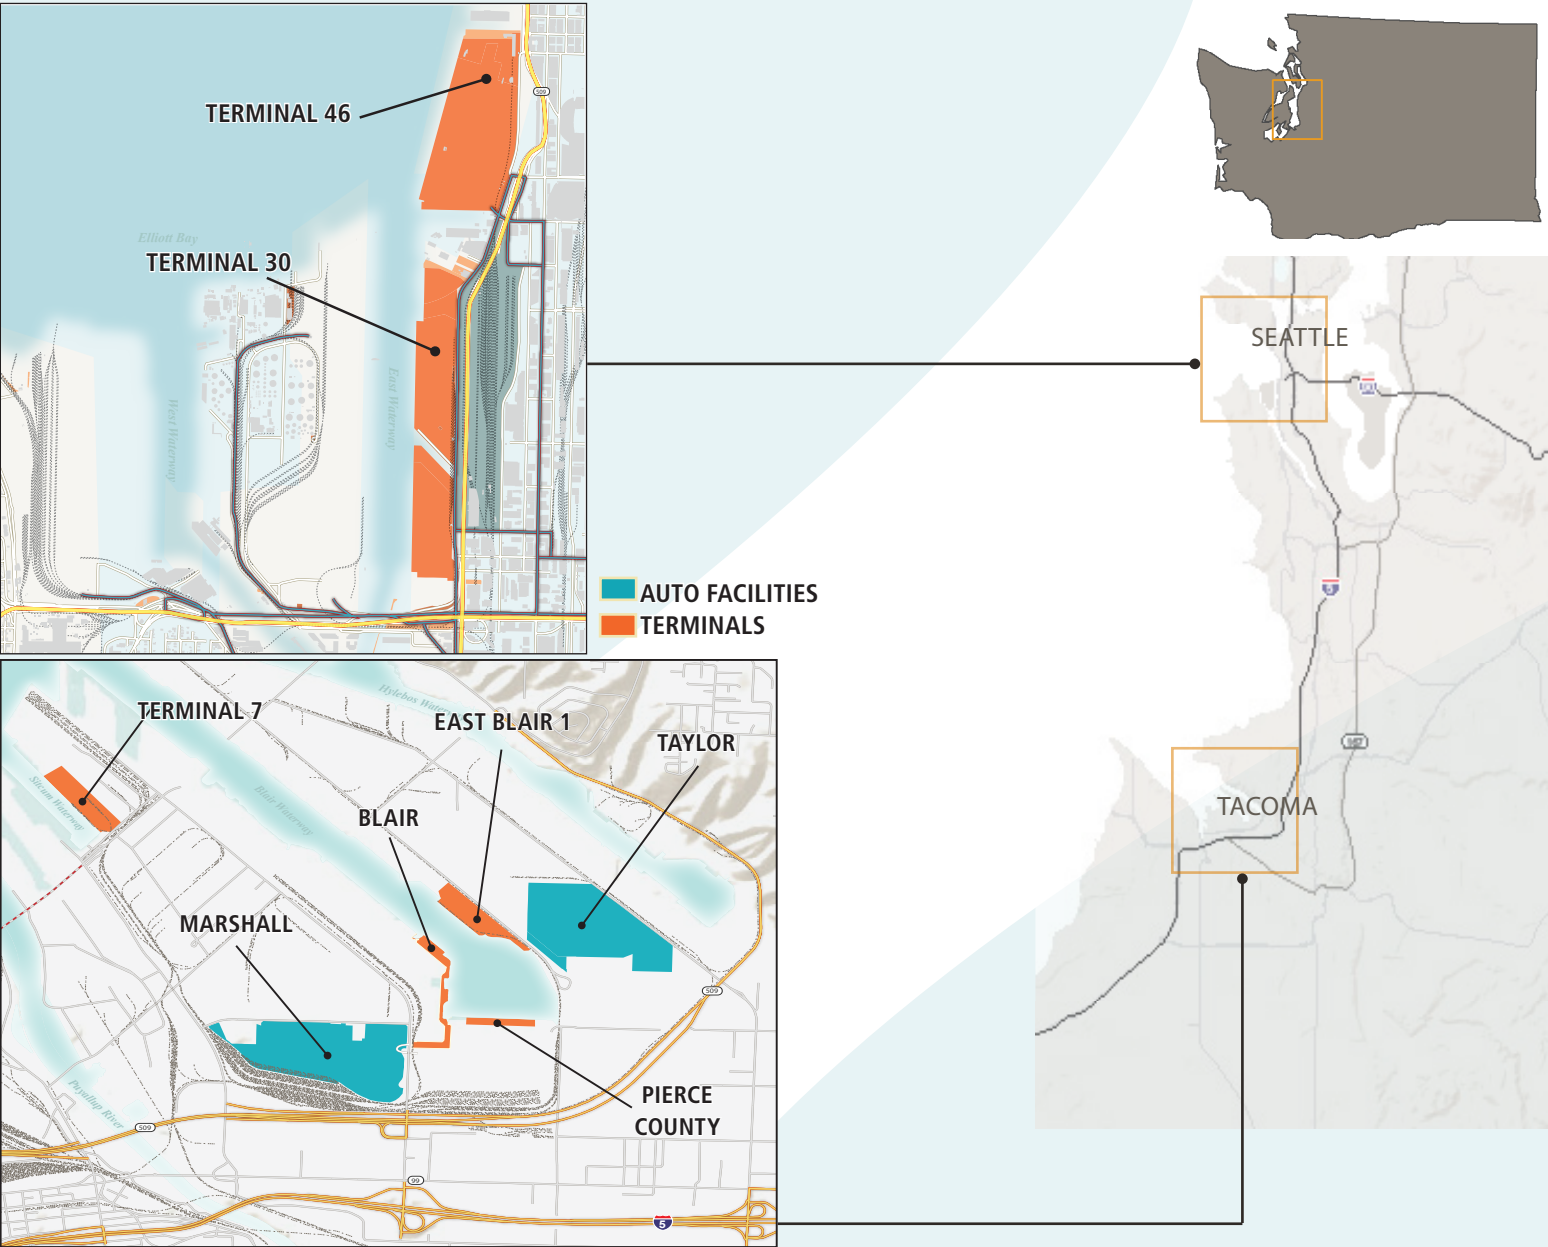

The NWSA has served the North American auto import market since 1970, with over 6.2 million vehicles processed in Tacoma. We handle several major brands: GM, Hyundai, Isuzu, Kia, Mazda, Mitsubishi, Nissan, and Volvo.

Better for Your Bottom Line

Storage yards can be activated as Foreign Trade Zones, offering potential savings and operational advantages for imports and re-export of auto parts and vehicles.

FINISHED VEHICLE PROCESSORS AND SUPPORT PIERS

TERMINAL	BERTHING	DEPTH	ACCESS	CARGO
TERMINAL 7	1,800 ft 549 m	51 ft 15.5 m	Marshall Ave	Autos / Ro-Ro
