SHORE POWER REQUIREMENTS

In accordance with NWSA's goals to reduce air pollutant and greenhouse gas emissions, as stated in the Northwest Ports Clean Air Strategy and the NWSA's Greenhouse Gas Resolution (Resolution 2017-02), each marine container terminal lessee (hereinafter "MTO") that has incorporated this tariff item into its lease or use agreement shall require any container vessels calling or layberthing at the NWSA's marine container terminals to comply with the following provisions effective March 1, 2022:

All shore power capable container vessels (as defined below) must connect to shore power when calling or layberthing at a terminal with a land side shore power system installed. The vessel and terminal operator will make all reasonable efforts to ensure that the shore power capable vessel connects to shore power and shuts down the onboard auxiliary engines within two (2) hours of “ready to work”, or in the case of lay berth, within two (2) hours of all lines fast, and disconnects from shore power no more than two (2) hours before “pilot on board” for departure.

Exception to the above provisions is made for vessel calls during which the vessel’s captain and/or MTO determine, in good faith, that connecting to shore power poses a safety risk to human health or property, or if the terminal’s shore power system is inoperable. A vessel’s first visit to a terminal with a shore power system is exempt to allow for commissioning.

A shore power capable container vessel is defined as: a vessel with onboard electrical infrastructure (electrical plugs, cables, and infrastructure) capable of plugging in and matching the electrical characteristics of the shoreside infrastructure (matching pair of Standard IEEE 350A, 7.2kV rated receptacles). When connected to shoreside electrical power, the vessel can shut down its main and auxiliary engines.

Each MTO will submit a report to the NWSA on an annual basis, by March 31 of each year, that includes the following information for each vessel call in the prior calendar year:

- Vessel name and IMO identification number
- Was the vessel shore power capable? (Yes/No)
- Did the vessel connect to shore power? (Yes/No)
- If applicable, the reason that the vessel did not connect to shore power.
- The total time at berth.
- If applicable, the total time using shore power.
- The total energy use while connected to shore power. In lieu of providing the specific energy use information for each vessel call, the MTO may negotiate with NWSA an alternate means of sharing energy use information, such as providing meter data.

ITEM 149.100

SOUTH HARBOR SHORE POWER CONNECT/DISCONNECT

In the event of a shore power capable container vessel (as defined in Item 149.000) calling or lay berthing at a South Harbor terminal, the Marine Terminal Operator must coordinate for vessel connection/disconnection via The Northwest Seaport Alliance Operations Service Center. Marine Terminal Operator will be billed at a rate of \$1,133.33 per connection/disconnection.

3) For purpose of these guidelines, pro forma shall mean the published vessel service schedule.

4) Schedule conflicts where all involved vessels are off pro forma (or off the ETA/ETD as referenced above) will be managed on an ad hoc basis.

(C) An arriving auto, ro-ro, or general cargo vessel whose planned presence on a berth has the potential of delaying a container ship's departure may be offered an alternative berth or directed to anchorage pending the container ship's departure.

(D) Unless idle following completion of stevedoring operations or as required by exigent circumstances, no vessel will be required to exit a berth solely to facilitate the transit of another ship.

Any vessel, upon notice to move, may be shifted by tug and any expenses shall be charged to the vessel so moved. Any vessel not vacating a berth when requested in accordance with the terms of Tariff No. 300 may be required to pay for all reasonable costs incurred by the impacted carrier and NWSA as a result of the delay to vacate. Export containers via Westbound rail.....	7 days
Containers arrived at North Intermodal Yard with Unknown Destination	5 days

Free Time starts the first 7 a.m. occurring after freight is received or unloaded onto wharf from car or truck; or, in case of freight received from Vessel, the first 7 a.m. occurring after container is discharged from a Vessel.

On outbound traffic to a Vessel, delivery of which is made after the allotted Free Time period, the day freight is loaded out, or delivered to truck or car, is to be considered a storage day.

Saturdays, Sundays and Holidays will not be counted. The Alliance must have information on the owner/lessor/consignee prior acceptance of the container.

NOTE: Containerized cargo may be subject to Free Time Rules and Demurrage Charges as carried in ocean carrier's Tariff. Cargo owners are therefore referred to vessel Tariffs. In the absence of overriding ocean carrier Tariff Rules, Free Time will be granted and Wharf Demurrage or Storage assessed in accordance with Rules, Conditions and Rates named in this Tariff.

When wharf demurrage commences at the expiration of Free Time, all days will be counted, including the day the container or chassis is removed from the premises. Empty containers that are damaged to the point they cannot be used for cargo and/or cannot be moved without extra equipment/manning or emergency gear shall be removed from Alliance premises within twenty (20) working days, or the Alliance will arrange removal at customer's expense.

For long-term storage arrangements, please contact the appropriate Marine Terminal Operator or the NWSA Operations Department for port-operated facilities.

ITEM 700.100

Gate Requirements

1. The MTO must operate a minimum of five day gates Monday through Friday, and be open from 8:00 a.m. – 5:00 p.m., exempting bargained holidays (“Required Gate Hours”),
2. Upon receipt of a request from the MTO, NWSA, in its sole and absolute discretion, will determine if any exceptions will be made to Gate Requirements identified in 700.100 (1).

ITEM 700.200

Data Exchange and Reporting

1. Data Reporting

In addition to a time stamp for each container vessel discharge/load, gate out/rail out, gate in/rail in, (potential source EDI 315, EDI 322) and incoming discharge projection the MTO shall provide the following data:

- Container number
- Cargo type (refrigerated, auto, breakbulk, RoRo, dry, etc.)
- Container status (full vs empty)
- Container size
- Vessel of discharge
- The number of reservations in the prior month, including fulfilled, “no-show,” and cancelled reservations.

2. Means of Data Delivery

Terminals must ensure terminal operating systems can transmit at minimum daily snapshots of data required by Tariff Item 700.300.1 in a consistent and programmable format, as agreed upon by facilitating teams (IT, contracted vendor, etc) of both organizations.

3. Compliance with Laws and Regulations

NWSA must comply with the Washington Public Records Act RCW 42.56 (PRA). To the extent data exchanged pursuant to this Item 700.300 is responsive to public records requests and there is not a valid exemption under the PRA, the NWSA will be required to disclose the data.

SECTION 8 **CLEAN TRUCK PROGRAM**

ITEM 800.000

Clean Truck Program (Subject to Notes A-B)

In accordance with NWSA's desire to achieve the air quality goals described in the Northwest Ports Clean Air Strategy, NWSA seeks to reduce diesel emissions from drayage truck operations at its cargo terminals.

NWSA needs to maintain an accurate count of Drayage Trucks calling at its leased marine cargo terminals to monitor air quality in the community and help optimize operations that boost terminal efficiency and further reduce fuel consumption. NWSA will therefore require all Drayage Trucks entering a leased NWSA marine cargo terminal to register with NWSA in accordance with the terms of this Tariff. This tariff does not apply to terminals owned and operated by NWSA.

Marine cargo terminal Lessees that have incorporated this tariff item into their leases or use agreements (hereinafter "Marine Terminal Operators" or "MTOs") will comply with the following provisions:

Notes:

A. Definitions

Drayage Truck: Any truck used to dray (transport) cargo, bare chassis, empty containers, and flatbeds.

B. Clean Truck Program

1. After April 1, 2018 (January 1, 2026 for domestic marine cargo terminals), and after necessary equipment and vendor software has been procured, installed, and configured by NWSA, MTOs will not allow unregistered Drayage Trucks or Drayage Trucks with pre-2007 model year engines onto their cargo terminals. MTOs will turn away Drayage Trucks that do not comply with these provisions.
2. Drayage Trucks with emission control technology equivalent to a 2007 model year engine must submit verification of efficacy to NWSA.
3. NWSA may, in its discretion, allow other non-compliant Drayage Trucks to enter leased NWSA terminals.

4. NWSA will procure and install the equipment necessary to enable MTOs to identify Drayage Trucks that comply with the standards of this Tariff ("Identification Equipment"). NWSA at its cost will provide to MTOs the gate transaction vendor software. MTOs will integrate the NWSA provided Identification Equipment and vendor software into their terminal operating systems and/or gate operating systems as needed. NWSA will provide first year maintenance and support of Identification Equipment and vendor software. Thereafter, the MTO is responsible for maintenance, repair, and replacement of the Identification Equipment, and for maintenance and support of the vendor software. Upon replacement by the MTO, the replacement Identification Equipment will be owned by the MTO. MTOs will grant access to NWSA to install Identification Equipment upon thirty (30) day's prior notice.
5. MTOs will grant electronic access to NWSA, in a format and to include such information acceptable to NWSA, to review all gate access decisions.
6. MTOs will procure, install, configure, and maintain, or will cause to be procured, installed, configured, and maintained, the necessary equipment and software per specifications provided by NWSA, which equipment and software will be housed and supported by MTO IT services, for operation of the terminal operating system and gate operating system, and for the terminal operating system and gate operating system to communicate gate access decisions to Drayage Truck drivers seeking access to the terminal.
