

Port Security

The Port of Seattle Police Department provides the primary law enforcement service at The Northwest Seaport Alliance properties in Seattle. The port police are the primary first responders for all reported crimes and incidents and enforce parking and traffic regulations within its jurisdiction.

Speed limit is 10 mph on all Seattle harbor facilities unless otherwise posted.

Call 206-787-3000 or 206-787-3490 to report any suspicious activity. The Social Media Response line is 206-787-4722.

TWIC Requirements

A Transportation Worker Identification Credential (TWIC) is required for all Port employees, terminal operators, longshore workers, truckers and others who require regular, unescorted access to Northwest Seaport Alliance restricted areas (i.e. marine terminals) and vessels. To access restricted Port-operated facilities, non-TWIC holders must be accompanied by a person who has been issued a TWIC and trained as an escort. Leased NWSA terminals have their own access guidelines.

For more information on the TWIC program:

- Visit the TWIC website: www.tsa.gov/for-industry/twic
- Call the TWIC Help Desk: **1-855-347-8371**
- Visit the Seattle TWIC Office at: **UES Enrollment Center**
2501 SW Trenton St.
(located inside Staples)
Seattle, WA 98106-3206

MARSEC Security Levels

MARSEC security levels reflect the prevailing terrorist threat environment to the marine transportation system, including ports, vessels, facilities and other critical marine infrastructure. When entering a Port restricted area, you will see a sign that identifies the current MARSEC level. At any time, one of three different MARSEC levels is in effect (I, II, or III). Higher levels may result in delays.

MARSEC I – the level for which minimum appropriate security measures shall be maintained always.

MARSEC II – appropriate protective security measures shall be maintained for a period of time due to a heightened risk of a transportation security incident.

MARSEC III – further protective security measures shall be maintained for a limited period of time when a transportation security incident is probable, imminent, or has occurred, although it may not be possible to identify the specific target.

U.S. Customs

U.S. Customs officials may inspect your container load, either manually or using the most current technology. The vehicle-mounted VACIS and Radiation Portal Monitors (RPMs) are non-intrusive inspection technology that scans containers to identify items such as explosives, drugs or weapons of mass destruction. The scans help ensure that your load is legal and safe for transport.

Container Pick-Up & Drop-Off Information

The information listed below is needed for delivery or pick-up of cargo. Make appointments via the terminal operator's approved scheduling system. Multi-company haulers must state the name of the company for which they are hauling. Confirm container availability and/or whether vessel is open for receiving prior to arriving at the terminal.

Required for all Transactions

- TWIC card (a list of approved TWIC escorts is available upon request)
- Valid driver's license
- Truck license number and state of registration
- Truck company name and SCAC code
- Truck/tractor weight (lbs.)
- Trailer/chassis/flatbed weight (lbs.). Include the weight of Genset if it is your own
- Clean Truck registration (RFID tag)
- PPE (safety vest)

Additional information may be required depending on transaction. Appointments and pre-arrivals are scheduled via eModal.

Import Cargo Pick-up

- Master/BL number
- Container number
- Schedule appointments for cargo in RTG rows at T18

Export Cargo Drop-off

- Booking number
- Seal number
- Commodity, temp settings (for reefer cargo)
- Check If vessel is open for receiving pre-arrival to terminal
- Schedule pre-arrival at T18 and T30

Empty Pick-up

- Booking number or release number
- Shipping line
- Equipment type (20'/40'/40' HC/45' reefer)
- Commodity, temp settings (for reefer cargo)

Empty Drop-off

- Container free of cargo, trash, and placards
- Schedule pre-arrival at T18 and T30

Chassis

- Match the correct chassis for the move: TPNP, DCLI, or SSCO
- Bare TPNP chassis require a booking number. Go to www.tracconnect.com and click EZ-book in the top right corner

Operator: NW Container Services
Gate Hours: Mon-Fri: 7am–4:30pm

Trucking Information

Keeping the Trucking Community Informed

We work to keep truck drivers and dispatchers informed of upcoming construction work, terminal holiday schedules and other issues that may impact access to our terminals.

Text **NWSA TRUCKS** to **468311** to receive text message updates (message and data rates apply).

Clean Truck Program

The Northwest Seaport Alliance (NWSA) Clean Truck Program requires all drayage trucks entering NWSA international container terminals in both the Seattle and Tacoma Harbors to have an RFID tag and a 2007 (or newer) engine, or a certified equivalent emission control system. Clean Truck Program requirements reduce diesel particulate matter emissions by up to 90 percent per truck.

Your RFID tag must be registered with current truck and driver information at www.emodal.com. While RFID tags are required on all compliant trucks, individual terminals may use green stickers when gates are experiencing downtime.

For a step-by-step guide for purchasing and registering an RFID tag, see:

www.nwseaportalliance.com/environment/clean-air/clean-truck-program

To request green stickers for your truck, register at:

www.nwseaportalliance.com/environment/clean-air/clean-truck-program/clean-truck-program-stickers

Call the Clean Truck Hotline at **253-592-6200** for more information.

Heavy Haul Network

The Heavy Haul Network (HHN) in the Seattle Harbor allows qualified loads more than the legal weight limit to be transported on city streets between intermodal facilities and marine terminals.

Use of the HHN requires a special permit. Permits can be obtained from the City of Seattle Department of Transportation, Traffic Permits/Commercial Vehicle Enforcement Division. A Commercial Vehicle Safety inspection will be required as part of the application process.

Visit <http://www.seattle.gov/transportation/permits-and-services/permits/parking-permits/heavy-haul-network-permits> for details, including a HHN map and list of Seattle city streets designated as part of the HHN.

Note: Trucks hauling overweight cargo in the Tacoma Harbor require a separate set of permits.

For heavy haul cargoes on Tacoma streets contact the City of Tacoma Commercial Vehicle Division at **253-591-5479** or online at: www.cityoftacoma.org/hhic

For heavy haul cargoes on SR-509, contact the State of Washington Dept. of Transportation at 360-704-6340 or online at: wsdot.wa.gov/commercial-vehicle/permits/home

Safety

Bridge Weight Restrictions

Weight restrictions are in effect for several state and city-maintained bridges leading into and out of the Seattle harbor. For details on locations and weight limits, see the web sites below.

City Bridges

- Magnolia Bridge to Pier 91 (no trucks allowed)
www.seattle.gov/transportation/projects-and-programs/programs/bridges-stairs-and-other-structures/bridges

State Bridges

- I-5 NB & SB over King-Jackson St - 20,000 lbs. per axle weight limit for BL & CL-8. Traffic from I-90 not carried
- I-5 NB & SB on the Broadway Ave Over-Ramps – 21,500 lbs. per axle weight limit for BL & 43,500 lbs. weight limit for SA. This bridge crosses over ramps, not on the I-5 mainline.
