WATERWAY GUIDELINES

The Northwest Seaport Alliance to taking additional steps to ensure the efficient use of the Blair waterway during this era of Neo-Panamax (i.e., 13,800 TEU), and greater, Ultra Large Container Ships (ULCS). The following Guidelines are established to coordinate all vessel transits when a ULCS is involved and shall apply effective immediately to the Blair Waterway in the South Harbor:

- A. Any vessel and or Barge activity on the Blair waterway will require 24hr minimum notification to the waterway Coordinator by email: waterwayactivity@portoftacoma.com and phone: 253-405-0368.
- B. Upon their identification (and at the earliest available opportunity), potential waterway scheduling conflicts will be internally reported from Operations Team to Commercial Team along with the recommended actions for resolving the conflicts.
- C. Potential schedule conflicts should be managed holistically to satisfactorily resolve all issues prior to arrival, including those which can be foreseen as arising later around the time of departure.
- D. When schedule conflicts in vessel arrivals or departures are foreseen:

1. Priority service will be given to container vessels (domestic and international) arriving or departing within two (2) hours of the vessel's Pro Forma.
 2. Secondary priority will be given to Auto Ro/Ro and General Cargo vessels arriving or departing within two (2) hours of the vessel's planned ETA/ETD as reported 96 hours prior to its anticipated arrival.
 3. For purpose of these Guidelines, Pro Forma shall mean the published vessel service schedule.
 4. Schedule conflicts where all involved vessels are off proforma (or off the ETA/ETD as referenced above) will be managed on an ad hoc basis.
- E. An arriving Auto Ro/Ro or General Cargo vessel whose planned presence on a berth has the potential of delaying a container ship's departure may be offered an alternative berth or directed to anchorage pending the ULCS' departure.
- F. Unless idle following completion of stevedoring operations or as required by exigent circumstances, no vessel will be required to exit a berth solely to facilitate the transit of another ship.
- G. The provisions of the NWSA Tariff shall continue to apply, including, but not limited to Item [151.300](#) (Vessel Berthing Rules: Vessels Required to Work Continuously).

ITEM 150.100

WATERWAY GUIDELINES: MANAGING POTENTIAL IMPEDIMENTS

The following highlights the factors which can interfere with vessel transits and summarizes the internal process for ensuring continuous and effective waterway coordination. Currently, the following issues may impede the transit (arrival and/or departure) of an ULCS in the Blair Waterway:

- A. North of the East 11th Street Corridor (i.e., "Goal Posts"):
1. The combination of bunker barge alongside TOTE, AND, a vessel at Terminal 3 & 4 (i.e., Husky Terminal and Stevedoring) with cranes extended (i.e., boomed down)
- B. South of the East 11th Street Corridor
1. WUT cranes 105 and/or 106 fully extended, with or without a vessel at berth.
 2. Vessels of any size concurrently moored at EB-1 and Blair Terminal (on opposing sides of the waterway)
- C. Wind speeds exceeding, or anticipated to exceed, 20 knots

D. Limited visibility (including nighttime hours)

E. Construction, dredging and/or survey activities in the waterway

Of note, a bunker barge alongside any vessel in the Blair Waterway could impede a VLCS or ULCS transit at the discretion of the pilot.

In consideration of the above, minimum daily communication and coordination must be maintained on these issues with the following parties:

A. Bunker Barge Schedules

1. Vessel agents
 - a) Inchcape
 - b) Norton Lilly
2. Barge operators
 - a) Harley/Olympic Tug and Barge
 - b) Vane Bros.
3. Marine Exchange

B. Vessel Schedules

1. Terminals and Agents
 - a) Husky Terminal and Stevedoring and Norton Lilly
 - b) TOTE
 - c) Washington United Terminal and HMM (Frederick Tse)
 - d) Everport and ACGI (for Evergreen Marine)
 - e) Inchcape and Norton Lilly (for EB-1 and Blair Terminals)
 - f) Wilhelmsen Shipping Services (WSS)
 - g) Marine Exchange

C. Container Crane Positioning and Status

1. Port of Tacoma Equipment Maintenance (or alternatively, Husky Terminal and Stevedoring in the context of vessel stevedoring operations)
2. Washington United Terminals, operations or maintenance

D. All the Above

1. Puget Sound Pilots Dispatch

Under most circumstances, regular engagement with these contacts will adequately address the activities at Port-owned and privately-owned terminal facilities in the Blair Waterway. However, the Waterway Coordination Desk must continue to maintain relationships with the private operators along the Blair Waterway so as to remain informed about their waterside activities.

Additional Considerations

1. Arrivals and departures of VLCS and ULCS should be managed holistically.
2. In the event a barge is unexpectedly on station against a moored vessel and the barge must be repositioned, Global Diving and Salvage may be contacted to remove the oil boom to facilitate repositioning of the barge.
3. As soon as a potential waterway conflict is foreseen, the individual staffing the Waterway Coordination Desk will contact the appropriate external stakeholders in order to remedy the situation. Should no immediate remedy be identified (or the stakeholders decline to adjust their plans) then the appropriate internal commercial stakeholders will be advised and consulted.

Any Vessel, upon notice to move, may be shifted by tug and any expenses shall be charged to the Vessel so moved.

2. The Base Storage Level (BSL) is calculated for each Automobile Manufacturer for the following year using 30-day dwell.

except otherwise provided in this Condition (E). Charged will be based on the earlier of the start date assigned by the Alliance or occupancy of any part of the Yard by User. There is no free time on any Yard under this tariff item. For any month in which the acreage available in a Yard as determined by the Alliance or Port under Conditions (A) and (B) above varies within such month, the lease acreage so available in such Yard in such month will be used for billing purposes for the entirety of such month. WHARF DEMURRAGE

FREE TIME PERIODS

Import Containers.....	5 days
Export Containers	10 days
Containers arrived at North Intermodal Yard with Unknown Destination	5 days

Free Time starts the first 7 a.m. occurring after freight is received or unloaded onto wharf from car or truck; or, in case of freight received from Vessel, the first 7 a.m. occurring after container is discharged from a Vessel.

On outbound traffic to a Vessel, delivery of which is made after the allotted Free Time period, the day freight is loaded out, or delivered to truck or car, is to be considered a storage day. Saturdays, Sundays and Holidays will not be counted. The Alliance must have information on the owner/lessor/consignee prior acceptance of the container.

NOTE: Containerized cargo may be subject to Free Time Rules and Demurrage Charges as carried in ocean carrier’s Tariff. Cargo owners are therefore referred to vessel Tariffs. In the absence of overriding ocean carrier Tariff Rules, Free Time will be granted and Wharf Demurrage or Storage assessed in accordance with Rules, Conditions and Rates named in this Tariff.

When wharf demurrage commences at the expiration of Free Time, all days will be counted, including the day the container or chassis is removed from the premises. Empty containers that are damaged to the point they cannot be used for cargo and/or cannot be moved without extra equipment/manning or emergency gear shall be removed from Alliance premises within twenty (20) working days, or the Alliance will arrange removal at customer’s expense.

For long-term storage arrangements, please contact the appropriate Marine Terminal Operator or the NWSA Operations Department for port-operated facilities.

SECTION 8
CLEAN TRUCK PROGRAM

ITEM 800.000 **Clean Truck Program (Subject to Notes A-B)**

In accordance with NWSA’s desire to achieve the air quality goals described in the Northwest Ports Clean Air Strategy, NWSA seeks to reduce diesel emissions from drayage truck operations at its cargo terminals.

NWSA needs to maintain an accurate count of Drayage Trucks calling at its international marine cargo terminals to monitor air quality in the community and help optimize operations that boost terminal efficiency and further reduce fuel consumption. NWSA will therefore require all Drayage Trucks entering an NWSA international marine cargo terminal to register with NWSA in accordance with the terms of this Tariff.

International marine cargo terminal Lessees that have incorporated this tariff item into their leases or use agreements (hereinafter “Marine Terminal Operators” or “MTOs”) will comply with the following provisions:

Notes:

A. Definitions

Drayage Truck: Any truck used to dray (transport) cargo, bare chassis, empty containers, and flatbeds.

B. Clean Truck Program

1. All Drayage Trucks entering an NWSA international marine cargo terminal must register with NWSA on or before April 1, 2018, or sooner pursuant to tariff revision, subject to the following conditions:

- a) Drayage Trucks with pre-2007 model year engines may not register after April 1, 2018.
- b) Drayage Trucks with a 2007 model year engine or newer, or with emission controls that achieve the equivalent level of air quality, that are calling at NWSA international marine cargo terminals after April 1, 2018 for the first time, may register after April 1, 2018.

MTOs in the south harbor will employ a visual method for achieving compliance with the Clean Truck Program standards under this tariff by April 1, 2018.

After April 1, 2018, or sooner at the sole option of NWSA, MTOs will not allow unregistered Drayage Trucks or Drayage Trucks with pre-2007 model year engines onto their cargo terminals. MTOs will turn away Drayage Trucks that do not comply with these provisions.

2. Drayage Trucks with emission control technology equivalent to a 2007 model year engine must submit verification of efficacy to NWSA.
3. Drayage Trucks with a 2007 model year engine or newer, or with emission controls that achieve the equivalent level of air quality, may continue to enter NWSA international marine cargo terminals at least through 2025.
4. As part of the Clean Truck Program, NWSA will administer a Deferral Program where MTOs may allow non-compliant trucks bearing a Deferral Program sticker to enter terminals through December 31, 2018, as long as such trucks meet Deferral Program guidelines.
5. NWSA may, in its discretion, allow other non-compliant Drayage Trucks to enter NWSA terminals.
6. NWSA will procure and install the equipment necessary to enable MTOs to identify Drayage Trucks that comply with the standards of this Tariff (“Identification Equipment”). NWSA at its cost will provide to MTOs the gate transaction vendor software. MTOs will integrate the NWSA-provided Identification Equipment and vendor software into their terminal operating systems and/or gate operating systems. NWSA will provide first year maintenance and support of Identification Equipment and vendor software. Thereafter, the MTO is responsible for maintenance, repair, and replacement of the Identification Equipment, and for maintenance and support of the vendor software. Upon replacement by the MTO, the replacement Identification Equipment will be owned by the MTO. MTOs will grant access to NWSA to install Identification Equipment upon thirty (30) day’s prior notice.
7. MTOs will grant electronic access to NWSA, in a format and to include such information acceptable to NWSA, to review all gate access decisions.
8. MTOs will procure, install, configure, and maintain, or will cause to be procured, installed, configured, and maintained, the necessary equipment and software per specifications provided by NWSA, which equipment and software will be housed and supported by MTO IT services, for operation of the terminal operating system and gate operating system, and for the terminal operating system and gate operating system to communicate gate access decisions to Drayage Truck drivers seeking access to the terminal.
