

NOTICE – West Hylebos Terminal RFP Discontinuation and Reissuance

February 24, 2021

The NWSA issued the West Hylebos Terminal Request for Proposals effective November 9, 2020 for the approximate 23-acre terminal in order to develop a water-borne marine cargo and/or other marine industrial business at the West Hylebos Terminal in support of the NWSA.

When the NWSA evaluated the submitted proposals it was determined that the submitted proposals did not provide sufficient information, comply with the requested use of the facility or meet the RFP requirements in order to make a qualified recommendation.

The NWSA is electing to discontinue the current RFP and **reissue a revised RFP effective February 24, 2021 for an additional 30-day period** providing additional requirements and clarification with the intention of receiving revised proposals and allowing for additional proposals that will more comprehensively address the requirements in the revised RFP. Companies that originally submitted proposals are strongly encouraged to resubmit revised proposals with the required additional information requested in the reissued RFP.

The NWSA wants to thank the respondents for the time and effort it took for their submittals and looks forward to receiving revised proposals for this RFP reissuance. The information provided will be used to better understand the market potential and refinement of future uses of the terminal.

Respectfully,

The Northwest Seaport Alliance Team
