

# OptConnect solo

Small Size, Magnetic Personality

Engineered especially for:  
**Micro Markets, Smart Safes, & Kiosks**

An industrial LTE Category 1 router, OptConnect solo excels in medium speed applications (2-3x times faster than 3G). Each OptConnect solo comes in a kit with all necessary components including: power cord, Ethernet cable, and antenna.

OptConnect solo provides a cost-effective solution for OEMs, operators, and deployers looking for the most reliable connectivity available, bundled together with an industry-leading suite of managed services.

## Easy Installation

Small and compact, solo also installs itself in seconds. With magnetic feet built into the base, solo attaches quickly and easily to any metal surface without a bracket, tape, or adhesive.

## Management Software

Every solo also comes with a lifetime license to Summit – our online device management platform that gives you the ability to check and manage your devices from anywhere. OptConnect solo also includes Glimpse™, an on-board API that responds to requests from your equipment's software and tells your equipment how solo's cellular connection is performing. Only OptConnect has Glimpse™.
