THE PORT OF TACOMA
Request for Proposals (RFP) # 071764
Electrical Equipment Testing and Maintenance

The Port of Tacoma (Port) is soliciting offers from highly qualified firms interested in providing the following services on Port maintained electrical equipment: development and execution of a Port wide scheduled Preventative Maintenance Program based on the electrical inventories provided by the Port. The firm includes all key members whether from the prime consultant firm or subcontractors for all necessary project services.

A. BACKGROUND

The Port is a major center for container cargo, bulk, break-bulk, autos, and heavy-lift cargo. Created by Pierce County citizens in 1918, the Port has become one of the largest container ports in North America and one of the top 50 in the world. The Port manages a diverse set of business operations relating to maritime trade.

To learn more about the Port, visit www.portoftacoma.com.

The Port owns and operates 480V rated electrical systems and medium voltage electrical distribution systems (up to 15Kv) on its container yards and on its heavy and light industrial properties. The Port values electrical reliability and safety for its customers, tenants and labor forces. Preventative Maintenance prevents larger electrical problems and increases electrical distribution reliability. This is aimed at increasing tenant satisfaction and to retain business in a highly competitive industry.

The Port anticipates awarding a single contract to the selected vendor. The period of performance of the contract is three (3) years, with an option to extend for two (2) additional one (1) year terms at the sole discretion of The Port.

NOTE: This solicitation and any resulting contract does not contemplate the use of the art of engineering. If the successful firm deems the art of engineering is necessary to accomplish certain aspects of work, such work will be done by a qualified engineer licensed to practice the art of engineering in the state of Washington in accordance with RCW 18.43.

The Port's Standard Terms and Conditions are included as Attachment B to this RFP. By submitting an offer, the Bidder represents that it has carefully read and agrees to be bound by the Port's Standard Terms and Conditions. Identify during the question submittal and response period, any sections you consider onerous, clarify why you consider these sections onerous, propose alternative language and describe why it is in the Port's best interests to adopt the alternative language.

Bids submitted with altered or conditioned Terms and Conditions without prior written agreement from the Port will be considered non-responsive and not considered for evaluation.

Proposers submit proposals understanding all contract terms and conditions are mandatory. Response submittal is agreement to the contract without exception. The Port reserves the right to negotiate changes to submitted proposals and to change the Port's

otherwise mandatory contract form during negotiations. If the Proposer is awarded a contract and refuses to sign the attached contract form, the Port may reject the Proposer from this and future solicitations for the same work. Under no circumstances shall Proposer submit its own boilerplate of terms and conditions.

Port of Tacoma reserves the right to reject any and all bids, to waive any informality in bids and to accept any item in the bid.

B. SCOPE OF SERVICES:

The objective of the project is to strengthen the reliability of the Port's electrical distribution system through electrical preventative maintenance. This will help create and maintain a safe work environment; reduce the impact on Port's customers by having the capability to check equipment and facilitate repairs prior to failure. The actual work will be done on time and materials at the rate established by the successful bidder. The scope of the overall project includes, but is not limited to:

- Perform infrared scans, megger testing and testing transformer oil with interpretation, recommendation and estimated costs of repair. Testing would be performed by a qualified testing agency to NETA and/or Equipment Manufacturers standards.
- Identify and recommend improvements/code compliance upgrades to better serve our tenants, create a safe work environment and facilitate maintenance.
- Deliver testing reports that show test results, conditions, and repair recommendations.
- Any other support or management required to meet the project's goals and intent.
