Land Net Location :	NESES04 T20N R03E W
Name of Location Map :	TACOMA SOUTH
Scale of Location Map :	24000
Altitude of Gage/Land Surface :	10
Method Altitude Determined :	Interpolated from topographic map.
Altitude Accuracy :	5
Altitude Datum :	National Geodetic Vertical Datum of 1929
Hydrologic Unit :	Puyallup
Drainage Basin :	N/R
Topographic Setting :	N/R
Flags for the Type of Data Collected:	NNNNNNNNNNNNNNNNNNNNNNNNNNNNNO
Flags for Instruments at Site :	NNNNNNNNNNNNNNNNNNNNNNNNNNNNN
Date of First Construction :	1965-12-17
Date Site Established or Inventoried:	1985-05-16
Drainage Area :	N/R
Contributing Drainage Area :	N/R
Data Reliability :	Data have been checked by the reporting agency.

Site Identification Number :	471526122262201
Site Type :	Well
Station Name :	20N/03E-04D01
Agency :	U.S. Geological Survey
District :	N/R
State :	WA
County :	Pierce County
Country :	USA
Land Net Location :	NWNWS04 T20N R03E W
Name of Location Map :	TACOMA NORTH
Scale of Location Map :	24000
Altitude of Gage/Land Surface :	120
Method Altitude Determined :	Interpolated from topographic map.
Altitude Accuracy :	10
Altitude Datum :	National Geodetic Vertical Datum of 1929
Hydrologic Unit :	Puget Sound
Drainage Basin :	N/R
Topographic Setting :	N/R
Flags for the Type of Data Collected:	NNNNNNNNNNNNNNNNNNNNNNNNNNNNO
Flags for Instruments at Site :	NNNNNNNNNNNNNNNNNNNNNNNNNNNNN
Date of First Construction :	1956-01-01
Date Site Established or Inventoried:	1985-05-21
Drainage Area :	N/R
Contributing Drainage Area :	N/R
Data Reliability :	Data have been checked by the reporting agency.
Data-Other GW Files :	YYNNNYNN
National Aquifer :	N/R
Local Aquifer :	N/R
Local Aquifer Type :	N/R
Well Depth :	N/R
Hole Depth :	N/R
Source of Depth Data :	N/R
Project Number :	N/R
Real-Time Data Flag :	0
Peak-Streamflow Data Begin Date :	N/R
Peak-Streamflow Data End Date :	N/R
Peak-Streamflow Data Count :	0
Water-Quality Data Begin Date :	N/R
Water-Quality Data End Date :	N/R
Water-Quality Data Count :	0
Field Water-Level Measurements Begin Date:	1956-01-01
Field Water-level Measurements End Date:	1956-01-01
Field Water-Level Measurements Count:	1
Site-Visit Data Begin Date :	N/R
Site-Visit Data End Date :	N/R
Site-Visit Data Count :	0
Latitude :	47.257044
Longitude :	-122.44068
Last Date in Agency List :	2023-02-13

Map Id: 42
Direction: NE
Distance: 0.453 mi., 2393 ft.
Elevation: 23 ft.
Relative: Higher

Site Name : 1341936 | 1341937 | 1341938
47.259675, -122.422568

District :	N/R
State :	WA
County :	Pierce County
Country :	USA
Land Net Location :	SESWS04 T20N R03E W
Name of Location Map :	TACOMA SOUTH
Scale of Location Map :	24000
Altitude of Gage/Land Surface :	10
Method Altitude Determined :	Interpolated from topographic map.
Altitude Accuracy :	5
Altitude Datum :	National Geodetic Vertical Datum of 1929
Hydrologic Unit :	Puyallup
Drainage Basin :	N/R
Topographic Setting :	N/R
Flags for the Type of Data Collected:	NNNNNNNNNNNNNNNNNNNNNNNNNNNNO
Flags for Instruments at Site :	NNNNNNNNNNNNNNNNNNNNNNNNNNNNN
Date of First Construction :	1940-01-01
Date Site Established or Inventoried:	1965-05-16
Drainage Area :	N/R
Contributing Drainage Area :	N/R
Data Reliability :	Data have been checked by the reporting agency.
Data-Other GW Files :	YYNNNYNN
National Aquifer :	N/R
Local Aquifer :	N/R
Local Aquifer Type :	N/R
Well Depth :	250
Hole Depth :	N/R

Site Identification Number :	471504122243801
Site Type :	Test hole not completed as a well
Station Name :	20N/03E-03F01
Agency :	U.S. Geological Survey
District :	N/R
State :	WA
County :	Pierce County
Country :	USA
Land Net Location :	SENWS03 T20N R03E W
Name of Location Map :	TACOMA NORTH
Scale of Location Map :	24000
Altitude of Gage/Land Surface :	13
Method Altitude Determined :	Interpolated from topographic map.
Altitude Accuracy :	5
Altitude Datum :	National Geodetic Vertical Datum of 1929
Hydrologic Unit :	Puyallup
Drainage Basin :	N/R
Topographic Setting :	Valley flat
Flags for the Type of Data Collected:	NNNNNNNNNNNNNNNNNNNNNNNNNNNNO
Flags for Instruments at Site :	NNNNNNNNNNNNNNNNNNNNNNNNNNNNN
Date of First Construction :	1984-01-16
Date Site Established or Inventoried:	1984-09-26
Drainage Area :	N/R
Contributing Drainage Area :	N/R
Data Reliability :	Data have been checked by the reporting agency.

HYDROLOGIC UNIT
Hydrologic Unit Maps
USGS
The United States Geological Survey created a hierarchical system of hydrologic units originally called regions, sub-regions, accounting units, and cataloging units. Each unit was assigned a unique Hydrologic Unit Code (HUC). As first implemented the system had 21 regions, 221 subregions, 378 accounting units, and 2,264 cataloging units. Over time the system was changed and expanded. As of 2010 there are six levels in the hierarchy, represented by hydrologic unit codes from 2 to 12 digits long, called regions, subregions, basins, subbasins, watersheds, and subwatersheds. The table below describes the system's hydrologic unit levels and their characteristics, along with example names and codes.

Appendix I
Interviews

426 East 11th Street Phase I ESA Interview

Interview with Kristina Younger

Mark Larsen and Matthew Davis of Anchor QEA conducted a telephone interview with Kristina Younger regarding the Property history and environmental conditions.

Kristina's father was born in 1938, two years after her family acquired the Property. The Property was used in 1938 to establish a retail lumber yard for Hampton Lumber Company. No lumber manufacturing was conducted on site at that time. It was only used for retail sales and storage.

Hampton constructed a 2-story industrial building in 1941. The building was later expanded in 1948. The building was destroyed by fire on November 6th, 1965. After the fire Hampton moved its operations. Hampton remains a going concern with multiple operations in Oregon.

No structures were constructed on the Property since the Hampton building burned down. The Property has been leased to different entities for storage of lumber and vehicles.

Wattles Company owned the adjacent Parcel 94 property between the 1970s and 2007. Both the Wattles Company and Lindal Cedar Homes used the Property for storage of lumber. Ms. Younger was aware that Wattles Company treated finished lumber on Parcel 94, including some of the wood that was ultimately stored on the Property. She recalled that Lindal Cedar Homes used the Property for lumber storage in the 1980s and 1990s.

After 2007 the Property has been leased to different entities for storage of vehicles and heavy equipment. Recent tenants included Ness Campbell Cranes and NTR Logistics. NTR Logistics is an over-size freight hauler for wind turbines and other large equipment.

Ms. Younger was not aware of any petroleum storage tanks or other hazardous materials having been stored at the Property. Nor was she aware of any spills or other hazardous materials incidents.

Ms. Younger did not have any prior environmental assessment reports or information for the Property.

Appendix J
Qualifications of Preparer

Mark Larsen

Principal Scientist

Mark Larsen is an Anchor QEA partner and principal scientist and manages the firm's Tacoma office. His 32-year career has focused on the cleanup and reuse of waterfront industrial sites under applicable state and federal environmental regulations. He manages multi-disciplinary project teams to resolve soil, groundwater, and sediment quality impacts, and to address the various requirements necessary for Brownfield property reuse. His practice focuses primarily on the Pacific Northwest, including extensive work in Washington, Oregon, Idaho, Montana, Hawaii, British Columbia, and Alaska. He helps clients manage environmental liabilities within the context of property acquisition and redevelopment and helps clients develop cost-sharing arrangements with other liable parties responsible for site contamination. Mr. Larsen has also assisted clients with litigation of environmental liabilities and has helped clients achieving equitable settlements of contribution actions and insurance cost recovery matters in lieu of litigation. Mr. Larsen assists public and private clients with liability tracking and reporting requirements, including compliance with U.S. GASB, SEC, ASTM, and FASB protocols and with Canadian Treasury Board requirements.

Education

BS, Biology, University of Puget Sound, 1991

Work History

Anchor QEA, Senior Consultant, 2007 to Present

RETEC, Senior Consultant, 1991 to 2007

Project Experience

Multi-Party Cleanup at the Whatcom Waterway Site

Port of Bellingham
Bellingham, Washington

Mr. Larsen is the regulatory and permitting lead for the investigation and cleanup of the Whatcom Waterway site in Bellingham. Mr. Larsen managed the development of the RI/FS under a MTCA/SMS Agreed Order, developed the Cleanup Action Plan and Consent Decree, and manages permitting and regulatory compliance activities for ongoing construction activities. The first $32 million phase of cleanup was successfully implemented during 2015 and early 2016. That work included implementation of groundwater source control measures, remediation of more than a mile of shoreline, and dredging and capping of contaminated sediments. Cleanup work was coordinated with the replacement of aging marine infrastructure as required to support ongoing use of Bellingham's shipping terminal and marine trades areas. This project is ongoing, including upcoming design and permitting activities for the second phase of site remediation, which will resolve cleanup liabilities for another 50 acres of aquatic land.

Project Experience

Non-Litigated Settlement at Former Lumber Mill Site Contaminated by PCP and Arsenic-Containing Slag

Portac Inc. and Port of Tacoma
Tacoma, Washington

Mr. Larsen recently facilitated settlement discussions between Portac Inc. (a subsidiary of Mitsui U.S.) and the Port of Tacoma relating to future remediation costs at this 50-acre former lumber mill site. Contamination at the site includes pentachlorophenol (PCP) from former sap stain treatment operations, and extensive arsenic contamination from copper slag used as ballast within the former log yard. Mr. Larsen developed the framework for settlement negotiations, defined data gaps necessary to resolve regulatory uncertainties, and then assisted the parties in procuring and managing a joint consultant to implement an RI/FS under a MTCA Agreed Order overseen by the Department of Ecology. The parties achieved an out-of-court settlement for $8.6 million.

East Waterway Source Control Evaluation

Port of Seattle
Seattle, Washington

Task manager for source control evaluation and recontamination studies performed in support of the East Waterway RI/FS, performed for the Port of Seattle, the City of Seattle and King County. The East Waterway RI/FS is overseen by EPA Region 10 under federal CERCLA regulations. The source control evaluations included a comprehensive evaluation of ongoing source inputs to the waterway, including stormwater, CSO discharges, spills, soil and groundwater contamination at nearshore cleanup sites, sediment transport, and atmospheric deposition. Source characterization activities were coordinated with multiple parties, including testing and reporting activities performed under different regulatory authorities.

Natural Recovery Study at Former Wood Treating Site

Burlington Northern Santa Fe Railroad
Paradise, Montana

Project Manager for studies of natural attenuation in support of an Alternate Concentration Limit petition for this RCRA closure at a former creosote treatment plant. Studies documented the natural biodegradation of naphthalene and other PAH compounds in site groundwater. Results were used to develop an improved compliance plan and remediation plan for the site which provided a more cost-effective method for achieving groundwater restoration.

Project Experience

Sediment Investigation, Risk Assessment, and Source Control within Victoria Harbor *Transport Canada* *Victoria Harbor, British Columbia*	Project manager for the characterization, risk assessment, and remedy evaluation for contaminated sediments managed by Transport Canada within Victoria Harbor, British Columbia. Mr. Larsen managed the comprehensive investigations to characterize the sediment contamination, evaluate risks to human health and aquatic receptors, and evaluate the status of stormwater source control and sediment natural recovery processes. Work is ongoing to design and implement expedited cleanup of nearshore contamination in one area of the harbor. That work includes coordination with upland soil and groundwater cleanup activities at that location. Mr. Larsen also worked with Transport Canada and the City of Victoria to implement stormwater source control agreements to protect sediment quality from ongoing pollutant inputs from an active scrapyard facility and adjacent industrial operations in one area of the harbor. These agreements are the first of their kind in Canada to proactively manage stormwater recontamination risks.
Cleanup, Source Control, and Cost Recovery at former Aluminum Smelter *Millennium Bulk Terminals Longview and Alcoa, Inc.* *Longview, Washington*	Mr. Larsen is project manager for the waterfront cleanup, source control and redevelopment at this 436-acre aluminum smelter in Longview, Washington. Work at this site has included completion of source control investigations, removal of contaminated materials remaining from prior site uses, completion of site-wide groundwater studies, and completion of an RI/FS which was finalized in 2015. Mr. Larsen led development of the cleanup Consent Decree with the State of Washington; that document was issued for public comment in early 2016. Mr. Larsen also assisted in recovering environmental remediation costs from a former facility operator. Sediment remediation was completed as an Interim Action in late 2016.
Forensic Investigations at Former Wood Treating Site *Carney Wood Products* *St. Maries, Idaho*	Task lead for historical research and forensics investigations used to resolve liabilities at this former wood treating site along the St. Maries river in Idaho. Work performed included review of historical aerial photographs, interviews with former treating plant employees, and development and implementation of forensics testing. The work documented the management and release of hazardous materials into the environment by the parent company of the former wood treater. This finding contributed to a favorable liability settlement for the owner of the property.

Project Experience

Strategic Support to Port-Wide Remediation Program
Port of Tacoma
Tacoma, Washington

Since 2007, Mr. Larsen has served as senior technical advisor to the Port of Tacoma. This work has included support to environmental remediation activities at more than 30 contaminated upland and sediment sites. Mr. Larsen's work has included environmental due diligence support during acquisition of industrial properties, development of a Port-wide remediation cost forecasts, and assistance to the Port in addressing environmental issues within leases to new tenants. Mr. Larsen has directly supported RI/FS activities, cleanup and interim actions and long-term monitoring at more than a dozen different cleanup sites. Mr. Larsen has also assisted the Port in developing cost-sharing agreements with Port tenants, former property owners and tenant insurance companies.

Multi-Parcel Groundwater Restoration and Site Redevelopment
Essex Properties
Seattle, Washington

Project Manager for the acquisition, cleanup, and redevelopment of properties affected by a multi-parcel groundwater contamination plume in Seattle's urban Eastlake neighborhood. Conducted pre-purchase site assessments and cost estimates. Evaluated cost impacts associated with new MTCA cleanup levels and testing methods. Negotiated environmental provisions associated with the purchase and sale of the property. Developed and implemented cleanup plan for the site under Ecology's Voluntary Cleanup Program to facilitate construction of an apartment building at the property. Addressed vapor intrusion risks as part of the site cleanup and redevelopment. Coordinated with the City of Seattle and an adjacent property owner regarding off-site soil and groundwater contamination.

Acquisition and Redevelopment of Former Chemical Plant Site
BP Carson Business Unit
Los Angeles, California

Mr. Larsen assisted BP with the acquisition and redevelopment of a portion of a former chemical plant adjacent to its refinery. The site was acquired in coordination with the local Brownfields redevelopment authority. The creative deal structure that minimized initial capital outlays and but captured tax-increment financing to help finance project traffic improvements and other development costs associated with the project. Mr. Larsen assisted BP in evaluating environmental risks at the site, and optimizing the development plan within the environmental constraints associated with the ongoing site cleanup activities. Construction of a new administration building at the site was successfully completed, including proactive management of potential vapor intrusion risks.

Cooperative Cost-Sharing Negotiations at Former RG Haley Wood Treatment Facility
Port of Bellingham
Bellingham, Washington

Project manager representing the Port of Bellingham, the former owner of this wood treating site. Contamination of soils, sediment, and groundwater at the site includes principally PCP and dioxin/furans. Worked with the current property owner, the City of Bellingham, to optimize the cleanup remedy. Supporting the Port and City in ongoing discussions regarding coordinated cleanup with an adjacent landfill site, and in resolving remediation liabilities through out-of-court settlements.

Project Experience

Brownfield Acquisition at Former Pulp, Paper, and Chlor-Alkali Plant Site *Port of Bellingham* *Bellingham, Washington*	Project manager for the Port of Bellingham's acquisition of the Georgia Pacific mill site in Bellingham, including 137 acres of waterfront property in the heart of downtown. Mr. Larsen managed the analysis of site conditions, environmental testing, development of project plans and cost estimates, and development of an environmental insurance policy addressing environmental liabilities at six cleanup sites acquired as part of the transaction. Developed cleanup plans for each of the cleanup sites, integrating them with upland reuse plans and planned navigation improvements. Supported the Port negotiation team in development of transactional documents and in coordinating property acquisition with regulatory and resource agencies. Helped secure extensive remedial grant funding procured through Washington's Local Toxics Account grant program.
Cleanup and Redevelopment of Multi-Parcel Site *Port of Bellingham* *Bellingham, Washington*	Project manager for the area-wide cleanup and redevelopment of Bellingham's Central Waterfront area. Work on the project was initially funded by a grant from the Environmental Protection Agency. Additional grant funding has been received from the Washington Department of Ecology. The work has included a feasibility study to redevelop a former municipal landfill into a 250,000-square-foot warehouse project. Developed site conceptual model, authored project report, and implemented pre-design testing to confirm the suitability of the proposed cleanup and development assumptions. Mr. Larsen is leading the completion of the area-wide RI/FS addressing remaining site cleanup issues, including cleanup of contamination from a former petroleum bulk terminal and a boatyard.
Area-Wide Brownfields Study *City of Seattle* *Seattle, Washington*	Mr. Larsen was the primary author of a report to the City of Seattle's Office of Economic Development summarizing the impacts of environmental liability and cleanup issues (particularly those associated with MTCA regulations) on the redevelopment potential for industrial properties in Seattle's Duwamish Industrial area. Reviewed the environmental and property development conditions at more than 200 sites, and made recommendations to the City regarding its potential roles to directly or indirectly remove barriers to cleanup and redevelopment of contaminated industrial sites.

Project Experience

Shoreline Cleanup and Redevelopment at Former Pulp Mill Site *Port of Anacortes* *Anacortes, Washington*	Mr. Larsen was the project manager for the cleanup and redevelopment of this shoreline property in Anacortes, Washington. The site was impacted by legacy contamination in soils, groundwater, and sediment from former pulp and paper mill operations. Mr. Larsen assisted the property buyer and seller in developing and then implementing a cleanup plan to resolve site cleanup liabilities. Cleanup actions were integrated with site redevelopment for commercial and public shoreline access uses. The project was "fast-tracked" to accommodate the aggressive schedule requirements of the property buyer. The project was completed successfully, on time, and under budget. Costs of the project were partially funded under a grant from the Washington State Department of Ecology.
Natural Resource Damage Evaluation at former Oeser Cedar Wood Treating Site *Oeser Cedar* *Bellingham, Washington*	Conducted an analysis of potential Natural Resource Damages and defenses for this active wood treatment facility in Bellingham, Washington. Site contamination had affected soils, groundwater, and off-site creek sediments. Work completed included a review of available data, analysis of NRD exposures and potential settlement strategies to resolve NRD exposures.
Environmental Due Diligence for Petroleum Refining Asset Purchases *Confidential client* *Alaska, Washington, Utah, North Dakota, California, and Hawaii*	Mr. Larsen managed multi-media environmental due diligence activities for a petroleum company during acquisition of five separate petroleum refineries and associated marketing terminals, pipelines, and retail service stations. Work included due diligence for purchase of refining and marketing assets in multiple states, as well as review of environmental liabilities associated with existing company assets. Due diligence addressed both remediation and environmental compliance liabilities.
Insurance Cost Recovery Litigation Support *Port of Bellingham* *Bellingham, Washington*	Mr. Larsen served as a consulting expert during the insurance cost recovery litigation addressing remediation expenses at more than 20 waterfront industrial properties. Mr. Larsen compiled case information for each site, developed liability estimates, identified key of exhibits in support of litigation, and coordinated with the Port's attorneys to manage the litigation effort. The litigation resulted in a favorable settlement with the Port's insurers, which has been used to fund ongoing remediation activities at the associated sites. Mr. Larsen has also supported the Port in successful liability settlements with several other liable parties addressing sediment, soil, and groundwater remediation liabilities.

Project Experience

Environmental Due Diligence and Cleanup at Former Coal Tar Refinery
Vulcan Northwest
Lake Washington, Seattle

Mr. Larsen managed the environmental due diligence activities for Vulcan Northwest during planned acquisition and redevelopment of a former creosote refinery located along the shoreline of Lake Washington. Contamination of soil, groundwater, and sediments posed significant constraints to the planned project. These constraints were identified and used to develop a modified project plan consistent with client requirements. Mr. Larsen led investigations to identify the nature and extent of contamination, developed remediation liability estimates, and coordinated remediation activities with the work of the client's various engineering, planning and legal team members. Mr. Larsen led outreach activities with state and federal regulatory agencies, permitting agencies, and affected project stakeholders including affected tribes and community members. Vulcan Northwest elected not to purchase the tar refining property, and it has subsequently been listed by the EPA as a Superfund site.

Remediation Planning for Active Graving Dock Facility
Public Works and Government Services Canada
Esquimalt Harbor, British Columbia

The Esquimalt Harbor Graving Dock is the largest active graving dock facility on the west coast of the Americas. It is owned by the Canadian federal government, and has been operational since the 1920s. The facility is affected by soil, groundwater, and sediment contamination. Mr. Larsen managed environmental investigation and remediation planning efforts necessary to develop a remediation plan to be implemented under the Federal Contaminated Sites Action Program (FCSAP). The work was expedited in order to facilitate potential governance change for facility operations, and as an early action during harbor-wide remediation of Esquimalt Harbor. Anchor QEA is currently providing construction management services during completion of the final phase of remediation.

RI/FS and Liability Settlements, Harris Avenue Shipyard
Port of Bellingham
Bellingham, Washington

Project manager for the RI/FS at this active shipyard to address soil, groundwater, and sediment contamination. Assisted the Port and its counsel in obtaining a non-litigated settlement with the Washington Department of Natural Resources resolving liability for impacts to state-owned aquatic lands, and obtaining non-litigated contributions from two former shipyard operators. Mr. Larsen also represented the Port in successful insurance cost recovery litigation with the Port's insurance carriers.

PCP Fate and Transport Testing for Former Wood Treating Facility
Delta Environmental
Minneapolis, Minnesota

Project manager for studies of PCP attenuation processes. Testing included verification of soil/water partitioning coefficients, screening for the presence of PCP-degrading microorganisms, and verification of biotreatment endpoints using microcosm studies.

Project Experience

Cleanup, Redevelopment, and Cost Recovery at Former Petroleum-Contaminated Site *Hopelink* *Bellevue, Washington*	Project Manager supporting Hopelink, a non-profit organization, in developing a food bank and community service center on a former Brownfield site. Mr. Larsen's cleanup work included implementing source identification studies, development of an integrated cleanup and redevelopment plan, obtaining regulatory and permit approvals, and providing construction management services. The project was completed on schedule, which was critical to capture more than $3 million in grant funding. Supported Hopelink in successful cost recovery efforts involving the adjacent property that was the source of the contamination. Settlement in the matter was reached after mediation.
Environmental Due Diligence at Former Reichold Chemical PCP Manufacturing Facility *Port of Tacoma* *Tacoma, Washington*	Project manager for environmental due diligence studies for potential acquisition of the former Reichold Chemical PCP manufacturing facility in Tacoma, Washington. This property remains heavily impacted by PCP and dioxin/furan contamination. Mr. Larsen led historical and regulatory research and advised the Port regarding cleanup and source control liabilities associated with the property. Ultimately the Port elected not to purchase the property.
Sediment Investigations and Environmental Due Diligence Former J.H. Baxter Wood Treating Site *Vulcan Northwest* *Renton, Washington*	Task lead for environmental due diligence during acquisition of this former wood treating facility located on Lake Washington. The site included extensive contamination of soil, groundwater and sediment from decades of wood treating activities. Contaminants included PAH compounds, PCP, dioxin/furans and wood waste. The site was ultimately acquired under a pre-purchase consent decree, and redeveloped into a training facility for the Seattle Seahawks.
Groundwater Fate and Transport Studies at Pacific Sound Resources Wood Treating Site *Port of Seattle* *Seattle, Washington*	Task lead for groundwater fate and transport studies for groundwater contaminated with creosote and related wood treating compounds. Studies were used in developing the scope of time-critical removal actions, and for development the final RI/FS and site-wide groundwater remedy. Results were incorporated into the final cleanup action and compliance monitoring framework. The site was redeveloped as a brownfield site for use as a container terminal.
Environmental Due Diligence for Acquisition of Active Wood Treating Site *Port of Tacoma* *Tacoma, Washington*	Project manager supporting ongoing environmental due diligence evaluations for the potential purchase of this active wood treating facility. This site has undergone previous cleanup actions under agreements with the State of Washington. However, contamination and RCRA-regulated structures remain at the site. Provided support to the Port during purchase and sale negotiations with the property seller. This project is ongoing.

Project Experience

Supplemental RI at Former Bulk Fuel Terminal *Port of Seattle* *Seattle, Washington*	Project manager for completion of a supplemental remedial investigation to document natural attenuation processes in groundwater at this former bulk fuel terminal. Cleanup work considered the active use of the property as a Port container terminal. The work was conducted under an Agreed Order with the Washington Department of Ecology.
Sediment Remedial Design and Cost-Sharing Support at Former Pacific Wood Treating Site *Union Pacific Railroad* *Ridgefield, Washington*	Project manager assisting Union Pacific Railroad during development by the Port of Ridgefield of the cleanup approach for contaminated sediments within Lake River adjacent to this former wood treating site. Contaminants included dioxin/furans associated with historical stormwater discharges from the site. Supported collaborative design discussions with the Port's consultant, provided technical comments on site reports, and assisted the railroad in developing a *de minimis* Consent Decree settlement proposal with the State of Washington.
Environmental Due Diligence at Former Baxter Arlington Wood Treatment Facility *Vulcan Northwest* *Arlington, Washington*	Project manager for environmental due diligence for acquisition of properties located at Baxter wood treating facility in Arlington, Washington. Work performed included historical research, soil and groundwater testing and strategic advice. Several properties were acquired by the client to support expansion of adjacent airport facilities.
Historical Research at Multi-Party RCRA/CERCLA Cleanup *Alaska Railroad* *Anchorage, Washington*	Task lead for manager for review of potential pollution sources within this 600-acre multi-parcel cleanup site. The work was conducted in support of an area-wide remedial investigation and feasibility study. Work was implemented under a joint RCRA/CERCLA agreement with EPA Region X.
RI and Risk Assessment at Former Railcar Maintenance Facility *ACF Industries* *Portland, Oregon*	Project manager for completion of a remedial investigation and risk assessment at this former railcar maintenance facility located near the Willamette River in Portland, Oregon. Source control evaluations demonstrated a lack of connection between the site and contaminated river sediments. Studies documented the presence of residual contamination at the site which was subsequently remediated.
Closure Monitoring for Biotreatment of Wood Treating Wastes as Galesburg Illinois Wood Treating Site *Burlington Northern Santa Fe Railroad* *Galesburg, Illinois*	Project manager responsible for development and implementation of a biological testing program to document successful completion of biotreatment of contaminated soils at this wood treating facility. The work was performed on behalf of Burlington Northern Santa Fe Railroad, the owner of the property. The soils were treated using biotreatment or "landfarming." Treatment performance was verified using soil bioassay testing with three different test organisms.

Project Experience

Cleanup and Redevelopment of Former Slag Disposal Area *NC Machinery* *Tacoma, Washington*	Project manager for the acquisition, cleanup, and redevelopment of this former slag disposal area. Contamination at the site included petroleum hydrocarbons and a highly-leachable form of slag byproduct. Contaminated soils were stabilized and managed by off-site disposal. The site was subsequently developed into a heavy equipment leasing and maintenance facility.
Feasibility Study for Cleanup of Former BNSF Roundhouse *Burlington Northern Santa Fe Railroad* *Othello, Washington*	Author of the feasibility study for the cleanup of this former roundhouse and engine maintenance facility located in Othello, Washington. Contamination at the site included petroleum hydrocarbons, heavy metals and PAH compounds.
CERCLA RI/FS for Former Manufactured Gas Plant *Cascade Natural Gas* *Bremerton, Washington*	Principal in charge for the ongoing remedial investigation and feasibility study for this former manufactured gas plant site located in Bremerton, Washington. The project is being performed under CERCLA regulations. Contamination includes impacts to marine sediments near the site. Anchor QEA led successful interim actions to remove and contain sediment hot spots pending completion of the final RI/FS. This project is ongoing.
Review of Off-Site Sediment Liabilities Near Manufactured Gas Plant Cleanup Sites *Confidential Utility Client*	Project manager for evaluation of off-site sources of sediment contamination near two former manufactured gas plant sites. Work included comprehensive historical reviews, identification of potential sources of sediment contamination, and completion of targeted sediment investigations and forensics testing to assist in differentiating site-associated and off-site contaminants.
Dioxin Source Evaluation at Former Shipyard and PCP Manufacturing Facility *Duwamish Shipyard* *Seattle, Washington*	Project manager for evaluation of off-site sources of dioxin/furan contamination at this former shipyard. The site was contaminated by heavy metals and shipyard contaminants, but co-contaminants included high levels of dioxin/furans. Contaminants were traced to historical releases from an adjacent chemical manufacturing facility that produced PCP and other chlorinated compounds.
Sediment Cleanup Studies for the I&J Waterway *Port of Bellingham* *Bellingham, Washington*	Principal in charge for completion of an RI/FS and cleanup action plan for this contaminated industrial waterway in Bellingham, Washington. Contaminants include mercury, nickel, PAH compounds, biological wastes, and dioxin/furans from multiple sources. Managed agency and stakeholder outreach activities, including development of cooperative cost-sharing agreements with a current Port tenant at the site. Supported the Port and its tenants in mediation relating to expected cleanup costs at the site. This project is ongoing.

Expert Witness Experience

Mr. Larsen served as an expert witness during several prior matters.

The first matter was a contribution claim initiated by his client, Hopelink, for remediation costs incurred at its food bank and family development center against the operator of the former gasoline services stations. Mr. Larsen provided testimony in depositions during 2002. The matter was resolved prior to trial following one round of mediation.

In 2017 and 2018 Mr. Larsen served as an expert witness during litigation between the Port of Ridgefield, Washington and Union Pacific Railroad at the former Pacific Wood Treating site in Ridgefield. Mr. Larsen provided testimony during depositions and at trial regarding the sources of contamination at the site, the divisible nature of the site and its site units, and the basis for a negotiated de minimum Consent Decree settlement with the Washington Department of Ecology. The matter was decided by the court in favor of the railroad.

During early 2022, Mr. Larsen served an expert witness in litigation between the Columbia Riverkeepers and Export Grain Terminal Longview (EGT) relating to alleged water quality violations from stormwater discharges and fugitive emissions. Mr. Larsen was designated as an expert witness on behalf of EGT to respond to the fugitive emissions claims. This matter was settled prior to trial on terms favorable to EGT.

During late 2022 Mr. Larsen served as an expert witness during litigation between Bornstein Seafoods, Inc. and the Port of Bellingham relating to historical sources of sediment contamination. This matter was litigated under CERCLA in federal court. Mr. Larsen authored expert and rebuttal reports on behalf of the Port identifying the causes of site contamination, the estimated costs to clean up the contamination and analyzing how liability should be allocated given the facts in the matter. This matter was resolved in favor of the Port.

During late 2022 and early 2023, Mr. Larsen served an expert witness in litigation between the Olympic Forest Coalition and Coast Seafoods Company relating to alleged Clean Water Act violations at the company's shellfish hatchery operations in Quilcene, Washington. Mr. Larsen was designated as an expert witness on behalf of the hatchery. This matter was resolved through a non-litigated settlement in early 2023 on terms favorable to the hatchery.
