

Port of Tacoma Invitation to Bid # 82650  
Addendum #1

**Date 6/28/2018**

The following is additional information regarding **ITB-82650** titled **Steel Wales Assemblies & Components** released on 6/14/2018. **The due date and time for responses remains as 7/3/2018 @ 2:00PM PST.** This addendum includes both questions from prospective bidders and the Port's answers, and revisions to the ITB. This addendum is hereby made part of the ITB and therefore, the information contained herein shall be taken into consideration when preparing and submitting a bid.

6/22	Date Received	Date Answered	Vendor's Question	Port's Answer	ITB Revisions
1	6/18/18	6/28/18	Will the Port be supplying any material this time or do we procure and fabricate everything? ie. plastic	The Port is not providing any materials for this procurement.	
2	6/18/18	6/28/18	As an out-of-state vendor would we be exempt from the Prevailing wage reporting requirements?	Washington State Prevailing wages can only be enforced for work done or for goods produced within the State of Washington. However, if you are trucking a finished good fabricated for a Public works project using other than a common carrier, the truck driver would be paid prevailing wages from the Washington State line to the public works Site.	
3	6/18/18	6/28/18	As an out-of-state vendor would we be exempt from obtaining a Washington business license?	If you have a nexus in the State of Washington you need a Washington State Business License.	
4	6/18/18	6/28/18	Will the delivery trucks need TWIC cards?	Delivery trucks can be escorted to the offload site with sufficient coordination. TWIC is not required.	
5	6/18/18	6/28/18	Per Section 09 96 00.C, the engineer will need a 14 day notice to inspect each coating operation, how is this possible within the desired delivery	See ITB Revisions	<b>Replace Section 09 96 00 3.04 C. with the following:</b> The Engineer or its designee may perform verification

Addendum #1

**Date 6/28/2018**

			date?		testing/inspection at its own expense. The Contractor shall make arrangements (if necessary) for these tests/ inspections at all facilities performing coating applications and give the Engineer a notice of at least 14 days in advance of the beginning of coating operations.
6	6/18/18	6/28/18	Would Hot Dipped Galvanized be an acceptable alternate for finish?	Hot Dipped Galvanized (HDG) is not an acceptable alternate finish for the steel wale assemblies. See specifications for acceptable use of HDG for other items.	
7	6/18/18	6/28/18	What is the expected NTP date? Last delivery of these assemblies was less than 30 days but it was less than half of the parts and no coating. August 13 <sup>th</sup> is not feasible especially with the shortages in the steel market.	NTP is anticipated to be within 7 calendar days of bid opening.	
8	6/22/18	6/28/18	Please confirm that field installation is not part of the scope of this bid.	As stated in the ITB we are only purchasing pre- assembled Wales, there is no installation component in this ITB.	
9	6/25/18	6/28/18	We had concerns about your desired delivery date of on or before the week of August 13,2018. We have 4 quotes in hand for the rubber fenders with delivery dates of 12 weeks. The UHMW is 8	On the Offer Sheet, there is a question about whether you can meet the desired delivery date. If not, tell us so, and tell us what date/time frame you can meet.

Addendum #1

**Date 6/28/2018**

			weeks out. This isn't even considering when we get approved drawings back from the port to make the order with, or bolting on and delivering them. If your engineer has a source with a better delivery time, we would appreciate to know the source.		
10	6/22/18	6/28/18	Combining all of our suppliers there is not enough UHMW plastic in stock to complete this, lead time is 4-6 weeks to produce more raw material.	See response to item 9 above.	
11	6/22/18	6/28/18	Can engineering provide more detail on the shackle and chain combination? There does not appear to be a shackle available that can connect the ½" chain and fit over the eyebolt or the Padeye. It would require 2 shackles at each end as an "adapter".	Additional shackles or hardware may be required depending on the selected chain and should be included in the bid". See attached pictures of existing shackle connections.
