

ERNIE BALL®

2021 PRODUCT CATALOG

“Great strings can’t cure a bad amp, an s-curve neck, or lousy room acoustics; but when all of these primary elements are correct, strings become bottom line! And that’s where we come in.”

ERNE BALL

STRINGS AND THINGS SINCE 1962

For more than 55 years, Ernie Ball has been the world’s leading manufacturer of strings and accessories in Southern California. Since introducing the original and iconic vibrant neon packaging of our Slinky guitar strings in 1962, Slinkys have become the most recorded guitar strings in the world; trusted by music’s most legendary and respected players including Jimmy Page, Eric Clapton, Jeff Beck, Keith Richards, Slash, Paul McCartney, Pete Townshend, Buddy Guy and thousands more across the globe. A third-generation, family-run company, Ernie Ball continues to offer guitar players the high-quality tools they need to create and share their music with the world.

INNOVATION

Our commitment to innovation is unmatched. Through endless research and development, Ernie Ball continues to push the boundaries of what a guitar string can be. Our long list of patented string offerings includes Cobalt Slinky electric guitar strings, M-Steel Slinky electric guitar strings, and Aluminum Bronze acoustic guitar strings.

SMELTING

Alloys used for strings are sourced from metal suppliers who start with ore which is smelted using high heat to remove unwanted impurities. The material is then cooled and forged into shape for conversion to wire. Our exclusive alloys used for Cobalt Slinky, M-Steel Slinky, and Aluminum Bronze strings are smelted to our exacting specifications which have been engineered to ensure optimum performance and consistency.

RAW MATERIALS

Our strings are made with the finest and freshest raw materials which are specified to exacting tolerances to ensure optimal consistency and performance. Each type of string consists of a specific combination of wire materials and sizes developed by Ernie Ball.

STRING WINDING

Our strings are wound using our signature core to wrap ratios. Cores are manufactured by cutting hexagonal shaped wire to length and twisting one end to attach a ball end. Once made, cores are loaded onto winding machines which spin the core while laying a consistent winding of wrap wire around it.

ELEMENT SHIELD PACKAGING

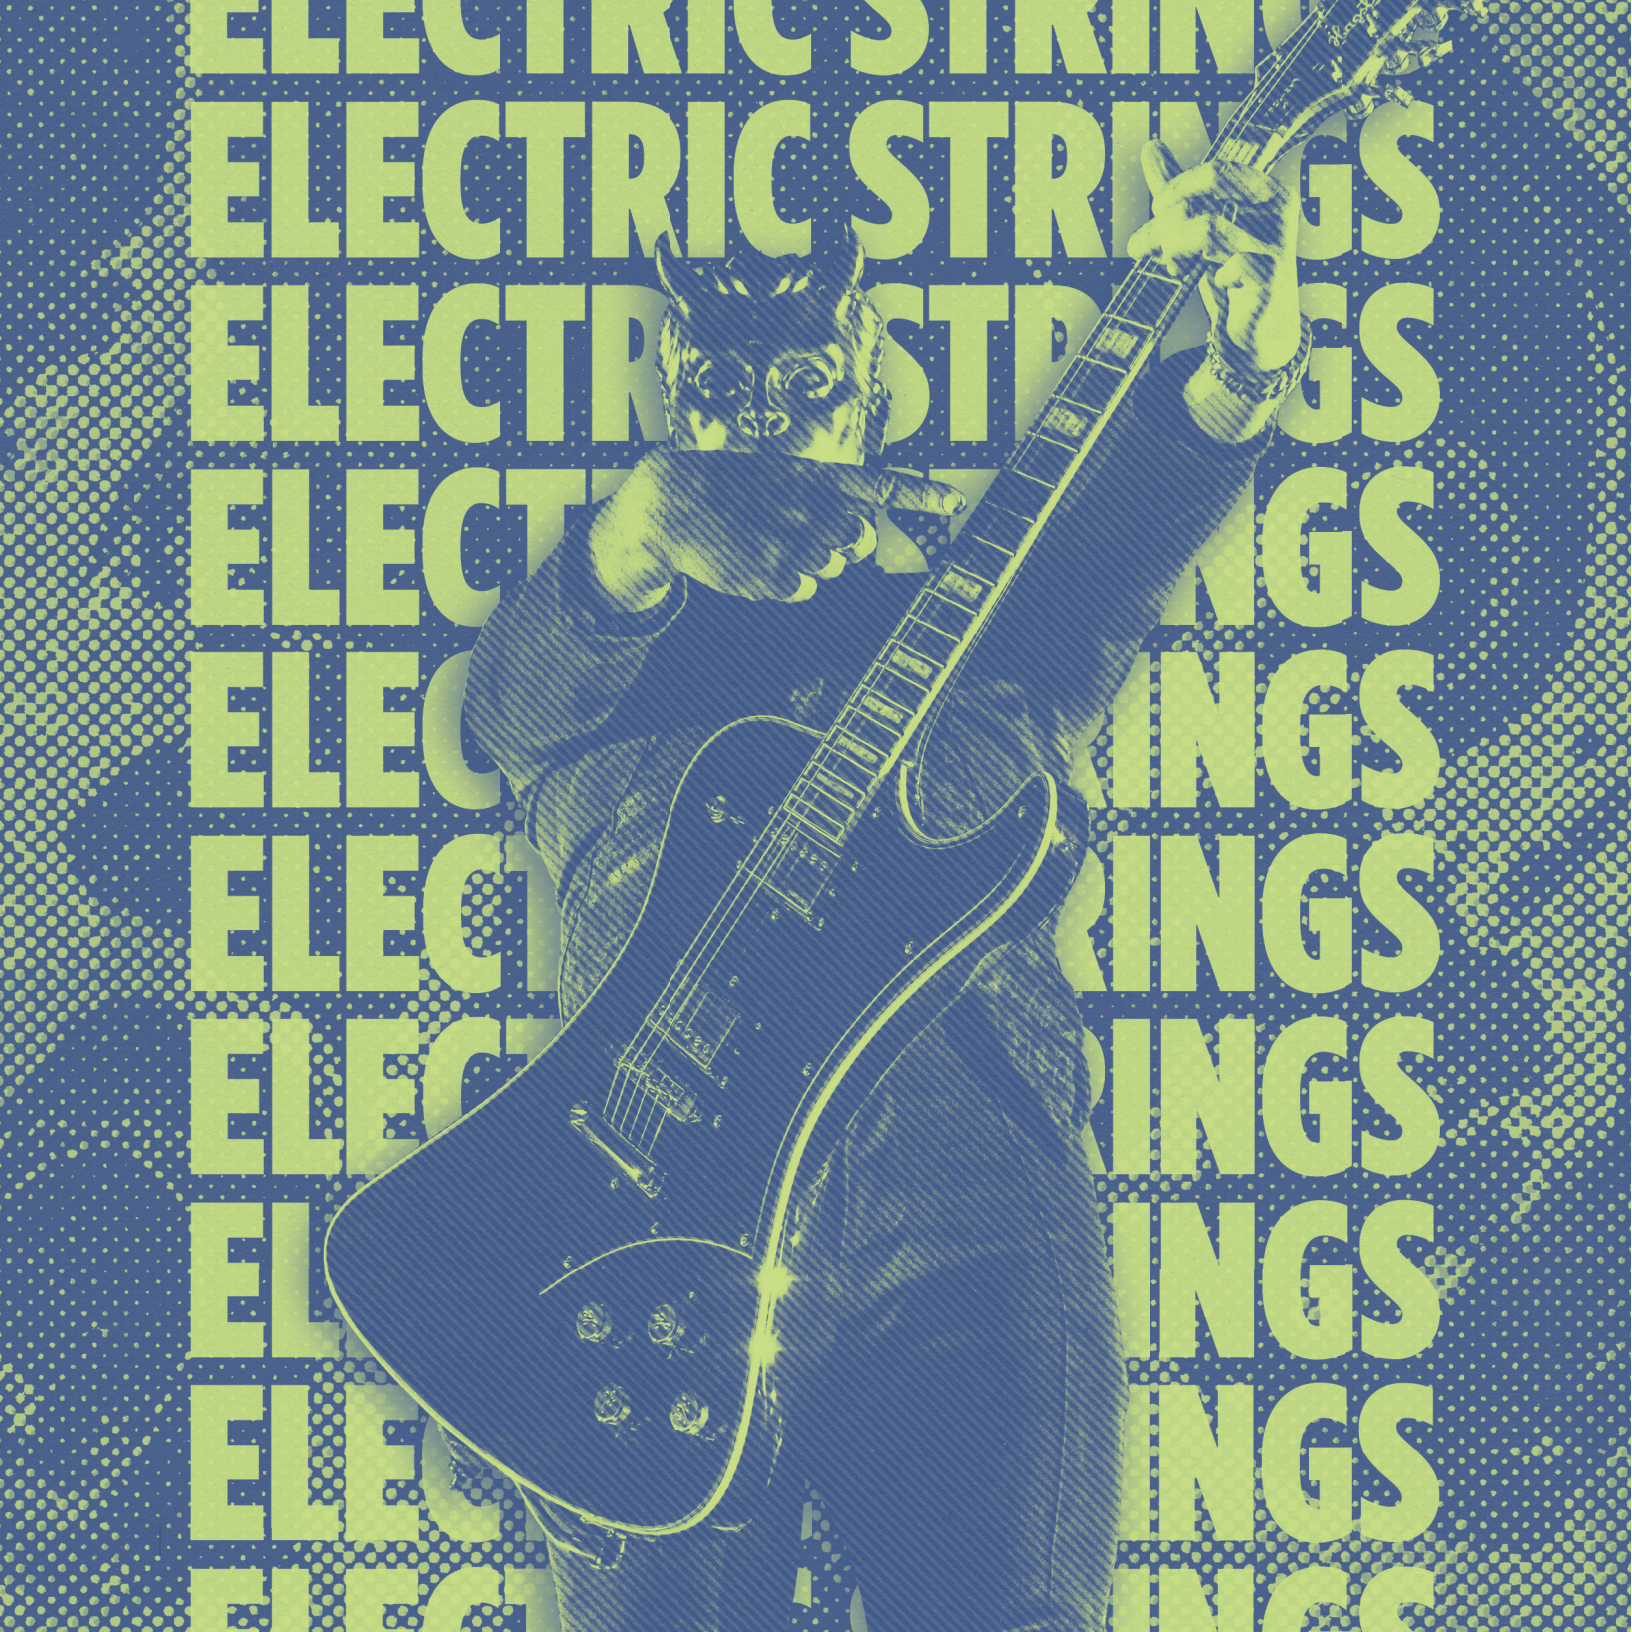

Ernie Ball strings are manufactured using our Element Shield packaging consisting of an impermeable film which is wrapped and sealed to ensure each set is air tight, eliminating moisture and ensuring longevity.

ORIGINAL SLINKY NICKEL WOUND

Ernie Ball Slinky Electric Strings are our top selling set, and are favored by many musicians around the globe. Regular Slinky strings are played by Eric Clapton, John Mayer, Steve Vai, and legions of guitar players worldwide. These strings are precision manufactured to the highest standards and most exacting specifications to ensure consistency, optimum performance, and long life. Regular Slinky wound strings are made from nickel plated steel wire wrapped around a hex shaped steel core wire.

PARADIGM SLINKY

Paradigm Electric Slinky sets provide unprecedented strength and longer string life while retaining 100% Slinky tone and feel. Ernie Ball's industry leading, ultra-high strength, steel is included in both the wound and plain strings, along with a patented reinforcement at the ball end twist of each plain string, to provide superior tensile and fatigue strength for strings that lock into tune fast and hold up under the most stressful playing styles and conditions. Experience the first set of longer lasting strings worth playing, with all benefits and no compromises.

SLASH SIGNATURE STRING SET

P03820

Ernie Ball introduces a limited edition set of custom wound Slash signature Slinky strings. Slash's new signature string sets are the culmination of over three decades of Slash and Ernie Ball's ongoing pursuit to create strings that provide more durability and tuning stability without sacrificing tone or feel. These new sets consist of his preferred 11-48 gauge Slinkys wound with Paradigm core wire and plasma enhanced nickel-plated steel wrap wire, while the Paradigm plain strings are constructed with a heavier brass wire reinforcement at each of the ball ends for better tuning stability and strength. These limited edition string sets are highly collectible and conveniently packaged in a three-pack tin box for easy storage.

FEATURES

- Bright, balanced tone
- Classic Slinky feel
- Wound strings wrapped with Paradigm plasma-enhanced nickel-plated steel around ultra high strength tin-plated steel hex cores
- Wound strings treated with patented Everlast nanotechnology
- Paradigm Ultra-High Strength Tin Plated Steel Plain Strings
- Reinforced Plains Strings (RPS) featuring heavier brass reinforcement
- Gauges (11, 14, 18, 28, 38, 48)

SLINKY COBALT

Engineered to maximize output and clarity, Ernie Ball Cobalt Slinky Guitar Strings are one of the latest innovations in string technology. Seeking to provide guitarists with a new voice, cobalt strings provide an extended dynamic range, incredible harmonic response, increased low end, and crisp, clear highs. Cobalt provides a stronger magnetic relationship between pickups and strings than any other alloy previously available. Cobalt Slinkys are also soft and silky to the touch, making string bending a breeze.

TONE PROFILE

FEATURES

- The world's first patented cobalt string
- Greater frequency response
- Superior clarity
- Element shield packaging
- Soft and slinky to the touch

TONE PROFILE

SLINKY M-STEEL

The loudest, most expressive strings ever created providing increased output, frequency response, and strength. M-Steel, short for maraging steel, is a superalloy used in high stress applications for the aerospace and defense industries. The wound strings are comprised of a patented Super Cobalt alloy wrapped around a maraging steel hex core wire, producing a richer and fuller tone with powerful low end response. M-Steel plain strings are comprised of a specially tempered steel for maximum fatigue resistance. A patented winding of steel around the ball end of the plain strings reduces slippage, breakage and stays in tune better than conventional plain strings.

11-48 | P02920

10-52 | P02915

SLINKY RPS NICKEL WOUND

A patented winding of brass wire is tightly wrapped around the lock twist of the ball end of the plain strings. String slippage and breakage are minimized at the ball end where these most often occur. Plain strings in RPS sets last longer and stay in tune better than conventional plain strings. Ernie Ball's RPS wound strings consists of specific gauges and core to wrap ratios for balanced rich harmonics and that signature Slinky feel. Ernie Ball Slinky gauge combinations, today's industry standard, were pioneered by our founder Ernie Ball more than 50 years ago, helping shape the sound of rock'n'roll.

NICKEL WOUND CUSTOM GAUGE

Widely referred to as a jazz set, Ernie Ball Nickel Wound Custom Gauge strings feature wound G strings. These strings are precision manufactured to the highest standards and most exact specifications to ensure consistency, optimum performance, and long life. All wound strings are made from nickel plated steel wire wrapped around a hex shaped steel core wire. The plain strings are made of specially tempered tin plated high carbon steel producing a well balanced tone for your guitar.

PARADIGM 80/20 BRONZE

Paradigm Acoustic strings provide unprecedented strength and longer string life while retaining 100% Earthwood tone and feel. Ernie Ball's industry leading, ultra-high strength, steel is included in both the wound and plain strings, along with a patented reinforcement at the ball end twist of each plain string, to provide superior tensile and fatigue strength for strings that lock into tune fast and hold up under the most stressful playing styles and conditions. The coupling of Ernie Ball's Everlast nanotreatment with breakthrough plasma enhanced wrap wire provides added corrosion resistance and reduced accumulation of tone-robbing buildup and debris while retaining the bright, balanced tone of 80/20 bronze.

PARADIGM PHOSPHOR BRONZE

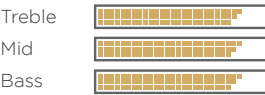

Paradigm Acoustic strings provide unprecedented strength and longer string life while retaining 100% Earthwood tone and feel. Ernie Ball's industry leading, ultra-high strength, steel is included in both the wound and plain strings, along with a patented reinforcement at the ball end twist of each plain string, to provide superior tensile and fatigue strength for strings that lock into tune fast and hold up under the most stressful playing styles and conditions. The coupling of Ernie Ball's Everlast nanotreatment with breakthrough plasma enhanced wrap wire provides added corrosion resistance and reduced accumulation of tone-robbing buildup and debris while retaining the warm, rich tone of phosphor bronze .

EARTHWOOD PHOSPHOR BRONZE

Ernie Ball Earthwood Phosphor Bronze Acoustics are made with phosphor bronze wire wrapped around brass plated high carbon steel hex cores. Engineered to meet the demands of acoustic musicians worldwide, these concert quality strings provide deep, rich bass notes with clear bright trebles. Each set is packaged in an ultra low humidity environment with Ernie Ball’s element shield packaging.

TONE PROFILE

FEATURES

- Wound with phosphor bronze wrap wire
- Warm rich tone
- Superior clarity
- Element shield packaging

EARTHWOOD 80/20 BRONZE

Ernie Ball 80/20 Bronze Acoustic strings are made from 80% copper, 20% zinc wire wrapped around brass plated high carbon steel hex cores. One of the most popular acoustic guitar strings as used by The Eagles, Elvis Costello, and Joe Bonamassa. Ernie Ball 80/20 bronze acoustic strings provide a crisp, bright sound with pleasing overtones.

A man with a beard and sunglasses, wearing a striped shirt, is playing a white bass guitar. The background is a solid orange color with a repeating pattern of the words "BASS STRINGS" in a bold, white, sans-serif font. The text is arranged in a grid-like pattern, with some letters overlapping the man and the guitar.

SLINKY NICKEL WOUND

Ernie Ball's signature recipe consists of specific gauges and core to wrap ratios for balanced rich harmonics and that signature Slinky feel. Using the finest and freshest raw materials, every string is manufactured using state of the art winding technology and undergoes strict quality control standards. Nickel Wound Slinky bass strings consist of nickel plated steel wrapped around a tin plated high carbon steel core for a balanced tone that compliments all electric bass types and playing styles.

TONE PROFILE

SLINKY STAINLESS STEEL

Stainless Steel Slinky bass strings consist of stainless steel wire wrapped around a tin plated high carbon steel core for a bright crisp tone that compliments many playing styles including metal, rock and funk.

TONE PROFILE

FLATWOUND BASS

Ernie Ball Flatwound Bass Strings consist of stainless steel wire ribbon wound around a tin plated hexagonal steel core. These strings are precision ground for a smooth, comfortable feel. The result is a deep, mellow tonality with less finger noise than traditional round wound bass strings.

VPJR TUNER

The Ernie Ball VPJR Tuner features a fast and accurate chromatic tuner with graphic volume display that is visually attractive and easy to operate. The large display automatically switches between tuner and volume modes depending on the signal level, allowing the player to tune at minimal volume. Other “always on” configurations are accessible via a double tap on the touch screen. The tuner can also be calibrated to a variety of ideal reference pitches. The pedal’s compact, rugged design consists of an aluminum housing, and features a stronger, more durable PVC coated Kevlar cord ensuring consistent tension throughout the foot sweep.

FEATURES

- Combined tuner and active volume pedal saves space, power, and signal routing on pedal boards
- Fast and accurate chromatic tuner and graphic volume display
- Enhanced definition touch screen
- Treadle can be routed as a gain control or as a master volume control
- Discrete buffer circuit with no tone loss through any signal chain
- Intelligent display activates tuner mode at minimum volume and a graphic volume readout when signal is present
- Stronger more durable PVC coated Kevlar cord

VOLT POWER SUPPLY

P06191

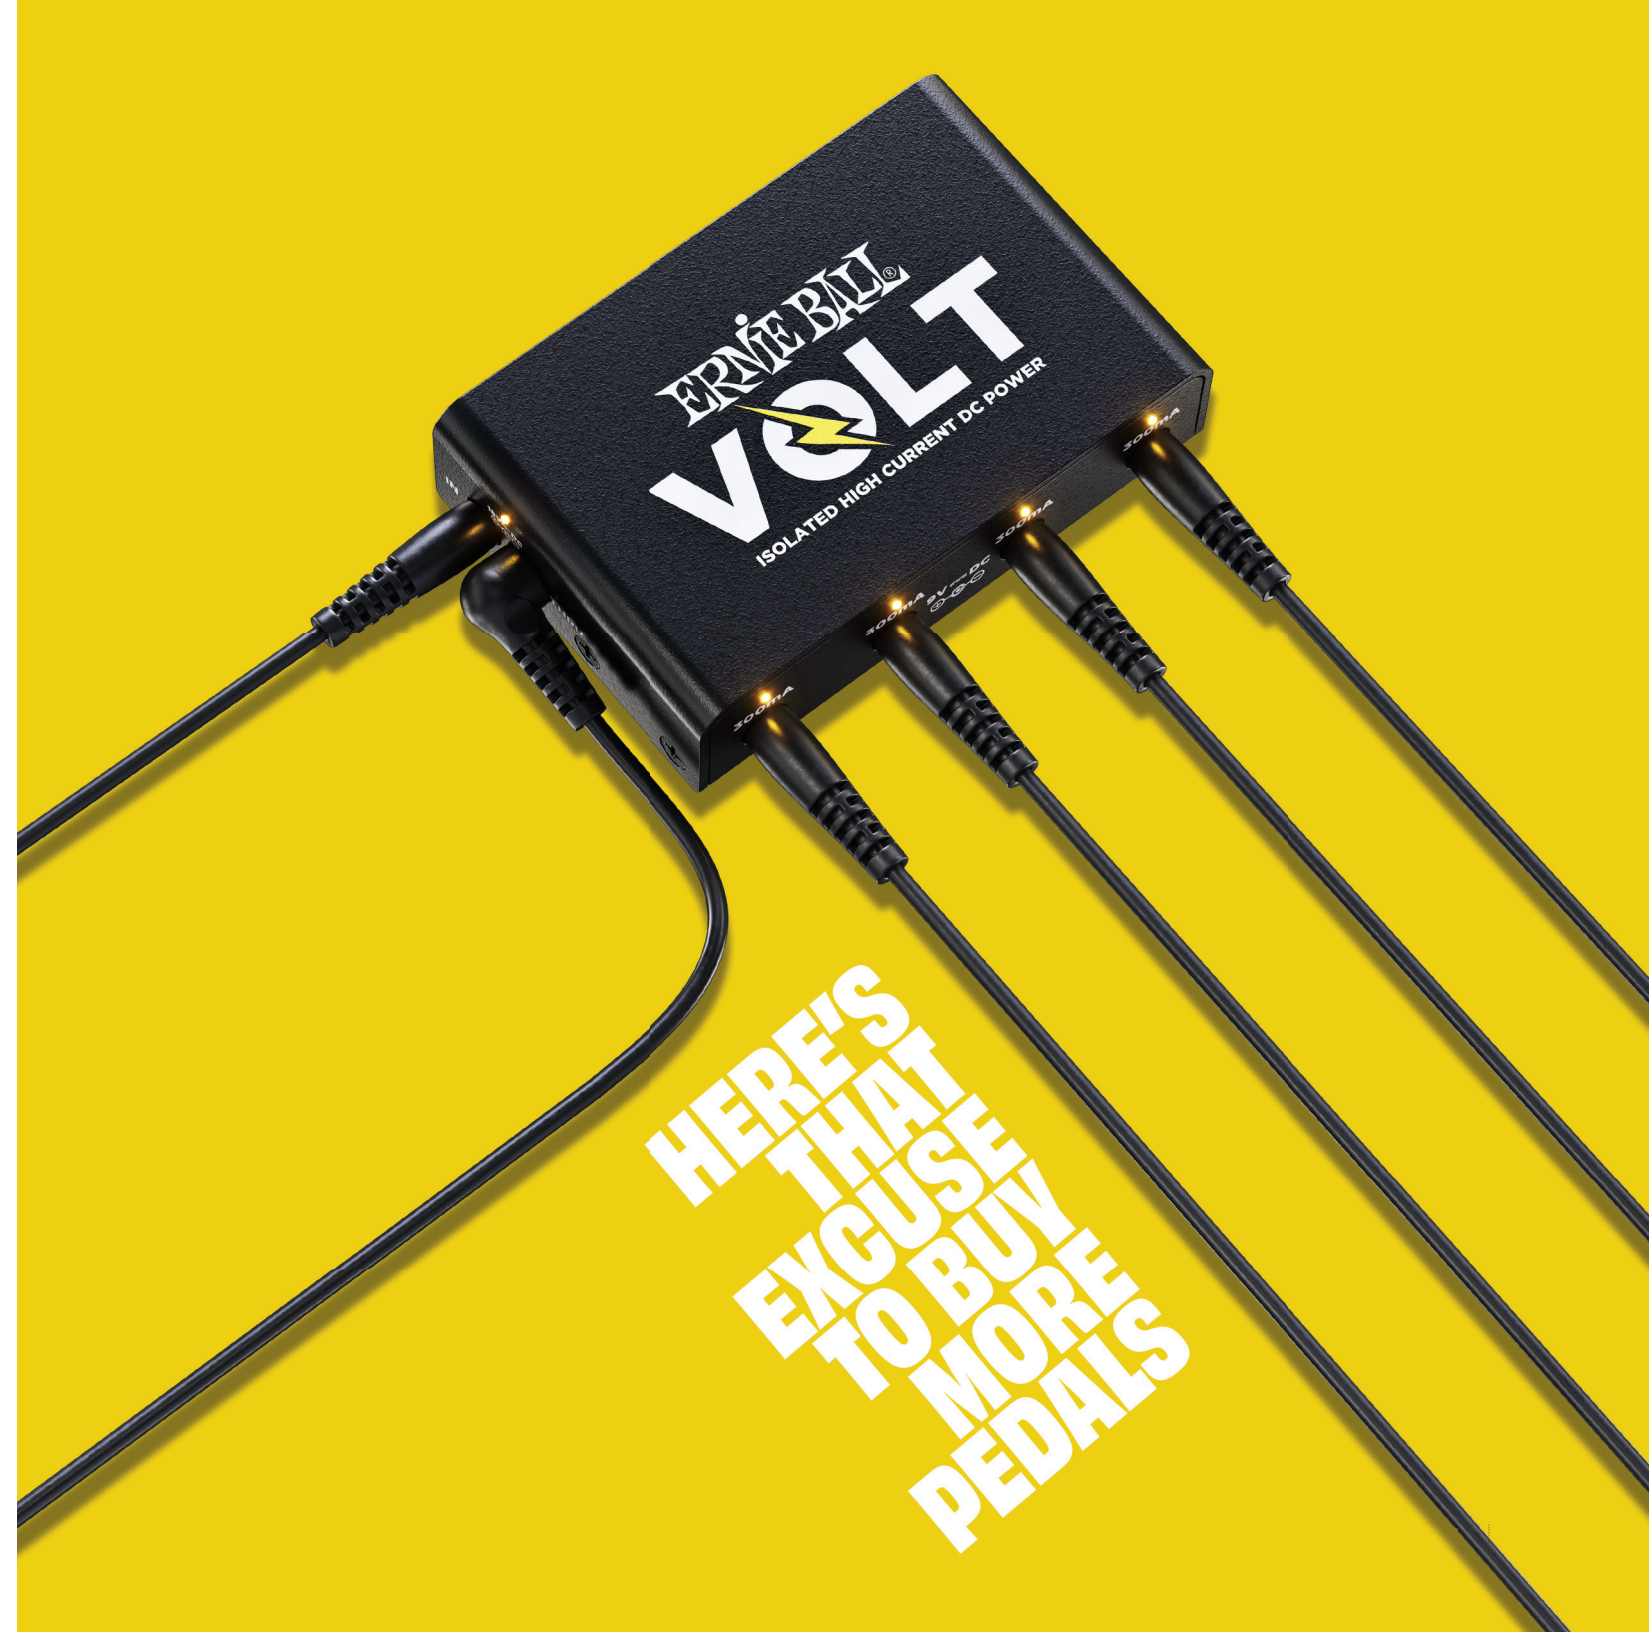

The Ernie Ball Volt gives the power to the pedal! With its multiple isolated, high current DC power outputs, the Volt supplies clean, regulated power to almost any digital or analog effects pedals. The compact and rugged housing can fit almost anywhere on even the most dense pedalboard. If you need low noise and reliable power for any gig, the Ernie Ball Volt is perfect for your rig!

FEATURES

- Extremely reliable with ultra low noise
- Regulated 9 and 18 Volt DC outputs
- LED indicators for each input/output and compact shielded housing
- Short Circuit and thermally protected
- Universal AC-adaptor included with four (4) interchangeable plugs for US, UK, EU, and China
- Five (5) DC Power cables included (500mm long)

40TH ANNIVERSARY VOLUME PEDAL P06110

Since its introduction in 1977, the Ernie Ball Volume Pedal has been the leading choice for musicians across the globe. The Ernie Ball 40th Anniversary VP Pedal features a luxurious slate black aluminum chassis with updated graphics for a striking appearance both on and off stage. A redesigned ultra durable Kevlar® cord improves potentiometer traction for precise volume control and a super smooth foot sweep. Inspired by the rugged design of the original, the pedal's compact extruded aluminum housing is virtually indestructible. Celebrate 40 years of quality, performance, and reliability with this new anniversary edition volume pedal only from Ernie Ball.

FEATURES

- Slate black aluminum chassis
- Improved Kevlar® cord for precise volume control
- Compact VPJR sized pedal chassis
- Switchable taper for two distinct swell rates
- Tuner output at any level
- No power required

ULTRA DURABLE KEVLAR® CORD

Our PVC-coated, braided Kevlar® cord ensures improved potentiometer traction, consistent tension, and a smoother foot sweep for highly expressive volume swells with unmatched confidence.

TAP TEMPO P06186

The Ernie Ball Tap Tempo is the perfect companion to the Ernie Ball Expression Series Ambient Delay or any other pedal requiring a standard normally-open momentary footswitch. Tap the switch to set the tempo and hear your delay rate (or other effect) sync up, bringing studio quality, time-based effects to your live performances. One 1/4" output jack and no power required.

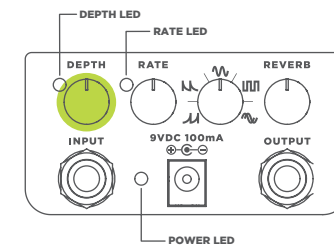

EXPRESSION TREMOLO P06188

Sleek, compact design maximizes playability, while minimizing the footprint on your pedal board. Unlock a virtually limitless tonal palette that simply can't be matched by traditional "on/off" stompboxes. Sealed aircraft aluminum chassis offers a mechanically and electrically superior experience by protecting internal components from outside elements.

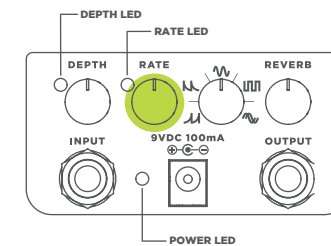

FEATURES

- 5 different tremolo waveforms: Slow Rise, Slow Fall, Sine, Square, Harmonic
- Control depth, rate, or both simultaneously with treadle
- Spring reverb level adjustment (foot gesture controlled)
- Mono Input/Mono Output
- 9V Input (power supply not included)

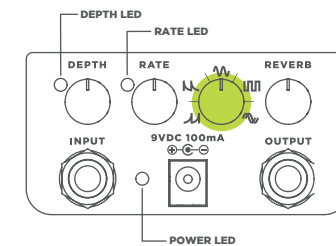

DEPTH

Adjusts the amount of volume variation. Press the DEPTH knob to toggle the depth LED on or off.

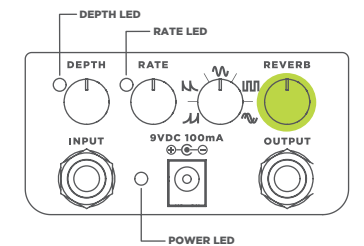

RATE

Adjusts the frequency of volume variation. Press the RATE knob to toggle the rate LED on or off.

WAVE

Selects the tremolo waveform

REVERB

Adjusts the desired amount of spring reverb mixed with the effected signal.

PEDALS

MVP MOST VALUABLE PEDAL

P06182

The Ernie Ball Most Valuable Pedal provides a super smooth foot sweep, ideal for precise volume control with no high-frequency loss at any volume thanks to a discrete buffer circuit. Works with both active and passive electronics, the MVP also includes a powerful gain boost allowing players to increase the audio signal up to +20 decibels. The MVP features a compact, rugged design consisting of aircraft grade aluminum housing that is virtually indestructible. Requires DC 9V/100mA minimum power supply or 9V battery.

VPJR 250K

P06180

The Ernie Ball VP Jr 250k provides all the same great features as our original volume pedal while reducing your footprint by 22%. The VP 250k Jr is perfectly voiced for passive signals and features a compact, rugged design consisting of aircraft grade aluminum housing that is virtually indestructible. Directly behind the input jack under the footplate is a micro taper switch which provides the user two distinct volume swell rates.

VPJR 25K

P06181

The Ernie Ball VP Jr 25k provides all the same great features as our original volume pedal while reducing your footprint by 22%. The VP 25k pedal is perfectly voiced for active signals and features a compact, rugged design consisting of aircraft grade aluminum housing that is virtually indestructible. Tough, long lasting braided Kevlar® cord transmits pedal travel to the 25k potentiometer and is attached by a stainless steel spring.

PEDALS

250K MONO VP

P06166

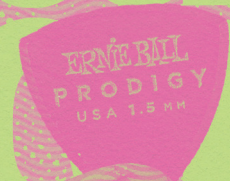

Ernie Ball's original full-size mono volume pedal features a super smooth foot sweep for precise volume control and is perfectly voiced for passive audio signals. Directly behind the input jack under the footplate is a micro taper switch which provides the user two distinct volume swell rates. The Ernie Ball VP 250k's rugged construction consists of aircraft grade aluminum housing that is virtually indestructible.

500K STEREO VOLUME PAN/PEDAL

P06165

The Ernie Ball 500k Stereo Volume Pedal features a 500k potentiometer suitable for the audio path of passive or active instruments. Attached to the footplate is a switch that provides the user two distinct operating modes (volume or pan). The stereo 500k pedal is extremely versatile and can be used in stereo or mono applications. Utilizing TRS stereo cables, use the B input and B output. For use as a typical pan pedal, switch the toe tap switch to the pan position and use only the A input. The pedal will pan the signal between the A and B outputs.

PEGWINDER PLUS P09604

The Ernie Ball Pegwinder Plus features an ultra-smooth ball bearing design for fast and easy string changes. This compact pegwinder fits easily in most cases and gig bags and makes a great addition to any musician's tool kit.

POWERPEG PRO P04117

The PowerPeg Pro is the latest edition to the motorized pegwinder family. Featuring a newly engineered wider head that fits all electric, bass and acoustic guitar tuning machines.

POWERPEG P04118

The Ernie Ball PowerPeg is the first of its kind self-contained motorized pegwinder that allows you to restring your instrument up to 70% faster than traditional manual pegwinders.

FLEXTUNE P04112

The Ernie Ball FlexTune is a portable clip-on tuner suitable for guitar, bass, and other stringed instruments. Featuring an 2" LCD screen, the FlexTune provides a large, vibrant display that is easy to read from any angle.

ERNIE BALL PEGWINDER P04119

The Ernie Ball Pegwinder is suitable for guitar, mandolin, banjo, and ukulele. It allows for fast, easy string installation and features a bridge pin puller for acoustic instruments.

JACQUARD GUITAR STRAPS

The world's number one Polypro guitar strap now available in an array of stylish new designs featuring embroidered leather ends with durable yet comfortable Polypropylene webbing. Machined stitched to quality black leather ends (EB logo stamped in gold print) for absolute maximum strength and longevity. Black Delrin adjustable buckle and connector further enhance durability and good looks. All jacquard straps are adjustable from 41" to 72".

FLAT RIBBON PATCH CABLES

Ernie Ball flat ribbon patch cables feature a high-quality design made with superior components that are built to last. The flat cable design and low-profile connectors allow for optimized pedalboard layout and cable routing. Multiple shielding materials preserve the signal with low handling noise, and the durable PVC jacket exterior ensures long-lasting performance.

**BRAIDED STRAIGHT/ANGLE
INSTRUMENT CABLES**

Ernie Ball Instrument Cables feature a high-end design made with superior components that are built to last. Instrument cables transmit a clean transparent signal that is superbly quiet while accurately and faithfully delivering all the frequencies your instrument produces. All braided cables feature a flexible, tangle resistant construction with a dual shielded, dual conductor design for a durability and low noise. The result is a natural, transparent sound with a balanced frequency response.

CAPOS

AXIS CAPO

The Ernie Ball Axis capo's ergonomic features allow for fast and accurate single handed key changes. A dual radius design conforms to flat or curved fretboards, ensuring buzz-free operation on 6 or 7 string electric and acoustic guitars.

FEATURES

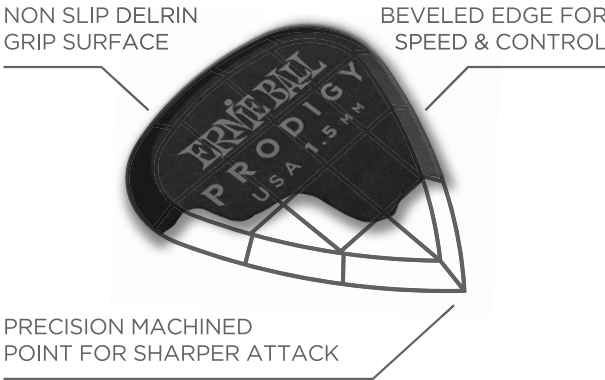

- Quick, single-handed operation
- Dual radius design fits flat or curved fretboards
- Precision-molded rubber pads safeguard instrument finish
- Optimal clamping pressure for buzz-free operation
- Made from robust lightweight aluminum
- Ideal for 6 and 7 string electric or acoustic guitars

PRODIGY

BAG OF 6

Ernie Ball Prodigy picks feature highly durable delrin material for a more secure non-slip surface. The machined beveled edge and sharp point at bottom allow for less drag, added articulation, and precise control while playing. These are now available in four new shapes and a multipack in 1.5mm and 2.0mm.
