

1. Login Allxon Device Manager and find the OOB enabler you are going to update
2. Find the IP Address and copy the IP address and paste it into your browser's address bar. to enter

Allxon WEB GUI

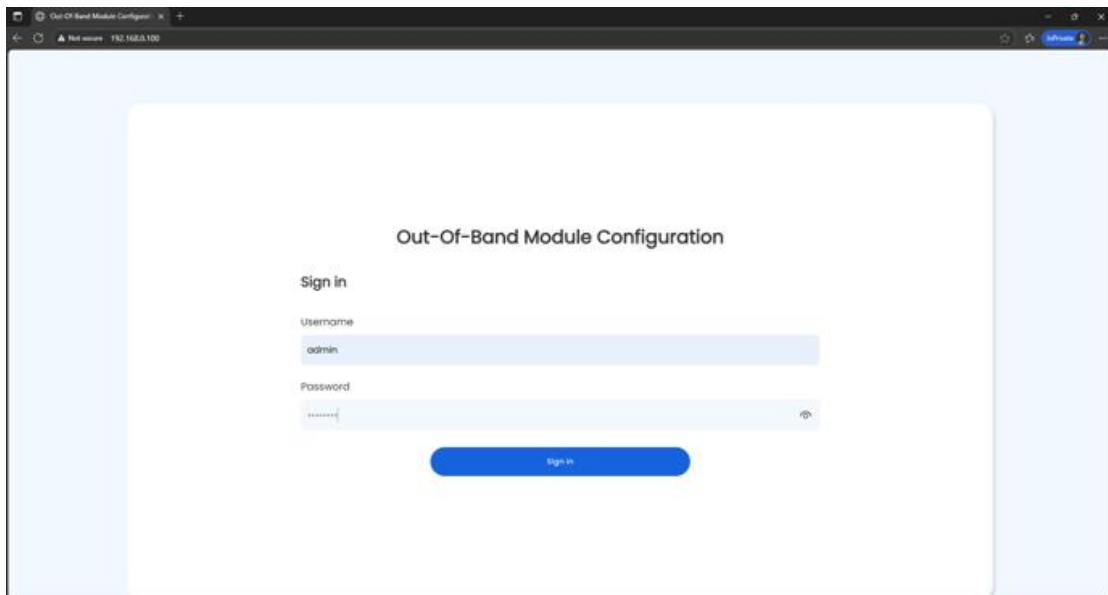

The screenshot shows the 'OOB Enabler' configuration page in the Allxon WEB GUI. The page has a header 'OOB Enabler' with an upward arrow. Below the header, there are three sections: 'Time Zone' with a value of '+08:00' and an edit icon, 'MPU' with a value of 'NUC980', and 'Firmware Version' with a value of 'fw_1.01.2008_a3042000_wiot'. Below these is a 'Network' section containing a table with three columns: 'Name', 'Mac Address', and 'IP Address'. The table has one row with the values 'eth0', '00:18:1a:f2:e1:69', and '10.1.10.6'. The 'IP Address' column is highlighted with a red box. At the bottom of the page, there is a 'Last update: Today at 03:33 PM' and a 'View More Information' link.

Name	Mac Address	IP Address
eth0	00:18:1a:f2:e1:69	10.1.10.6

3. Enter Username and Password to login

Username: admin

Password: oobadmin

The screenshot shows the 'Out-Of-Band Module Configuration' login page. The page has a title 'Out-Of-Band Module Configuration' and a 'Sign in' section. Below the title, there are two input fields: 'Username' with the value 'admin' and 'Password' with a masked value. Below the input fields is a blue 'Sign in' button. The page is displayed in a web browser window with the address bar showing '192.168.0.100'.

4. Find the Firmware Upgrade field and click on the Choose File button to upload the downloaded firmware patch for the update.

Out-Of-Band Module Configuration

System Configuration

OOB Module Mode: Cloud Mode

Model Name: OOB Enabler

Serial Number: ID: [To Clipboard](#)

MAC Address:

Firmware Version: fw_1

Firmware Upgrade: no file selected [Choose File](#)

[Start Upgrading](#)

5. The system will reboot automatically after the update. Once the reboot is complete, check the firmware version on the Allxon Portal.
