# The Thurston County Coroner's Office

---

The Thurston County Coroner's Office investigates sudden, violent, unexpected, and suspicious deaths that occur in Thurston County. Deputy Coroners are medicolegal death investigators and respond to death scenes at any hour and anywhere within the geographical boundaries of Thurston County. The Coroner's Office determines cause and manner of death after a complete investigation and postmortem examination, if required. In addition, the Coroner's Office provides cause and manner of death for the death certificate. Complete findings of the death investigation are distributed to families and law enforcement agencies as appropriate.

The main duties of the Coroner's Office are to determine the cause and manner of death. The cause of death is the disease process or injury that resulted in death. There are thousands of diseases and injuries that may result in death. The manner of death is a classification in which a determination is made regarding whether the death resulted from natural causes, homicide, suicide, or accident. On occasion, the manner of death is classified as undetermined.

Information collected during the investigation helps clarify the circumstances, such as the sequence of events prior to death. Evidence collected during an investigation and/or postmortem examination may help lead to the arrest or successful conviction of a suspect in a homicide case.

Because deaths occur around the clock, Deputy Coroner Investigators are available 24 hours a day, 365 days per year.

With the skill and experience of the medicolegal death investigators and board-certified forensic pathologists, the quality of death investigations in Thurston County are among the best in the State. The death scene investigation reports by the Deputy Coroners are very thorough and supply comprehensive information to the Forensic Pathologists conducting the postmortem examinations.

Our Coroner and Deputy Coroners also extend their duties to the living by answering questions and addressing concerns regarding deaths within the county. Deputy Coroners are frequently in contact with family members of a deceased and assist them by providing appropriate answers regarding the circumstances of the death and directing next steps in making final arrangements for their loved one.

We extend our sincere gratitude to the Thurston County Board of County Commissioners for their support of the Coroner's Office and the services we provide to the people of Thurston County.

# Thurston County Coroner's Office Staff

---

Gary Warnock  
Coroner

Traci McCullah  
Lead Investigator/Deputy Coroner

Molly Ivanovich  
Administrative Assistant 2

Karen Peek  
Deputy Coroner

Donald Seese

Megan Quinn, M.D.  
Forensic Pathologist

Eric Kiesel, MD, PhD  
Pathologist

Emmanuel Lacsina, M.D.  
Forensic Pathologist

Jermame Evans  
Lead Morgue Technician

## Types of Deaths Reportable to the Coroner

---

The Revised Code of Washington (RCW) 68.50.010 mandates that specific types of death be referred to the Coroner

for investigation (see list below). These deaths include sudden and unexpected deaths, accidental deaths, and violent deaths. The Coroner has the authority under the law to order an autopsy at any time it is deemed necessary to determine or confirm the cause and manner of death.

### Deaths Reportable to the Coroner:

- Violent deaths (e.g., strangulation, gunshot, stabbing, poisoning, etc.)
- Accidental deaths (e.g., falls, drowning, motor vehicle collisions, burns, overdose, etc.)
- Death of a prisoner (e.g., deaths in any county or city jail while imprisoned or in custody)

- Suspicious Circumstances (e.g., Unidentified bodies or events surrounding death)
- Deaths caused by unnatural or unlawful means
- Sudden and Unexpected deaths (e.g., all deaths during a surgical procedure, anesthesia-related, unexpected natural death, occupational-related deaths)
- Death due to a violent contagious disease or suspected violent contagious disease
- Death of a mother due to an abortion
- Unexpected infant deaths
- Without medical attendance; In cases of chronic illness, the attending physician may sign the death certificate
- When a decedent is not claimed by relatives or friends

The Coroner would determine if an autopsy is needed for any of the reportable deaths listed above.

## **RCW 68.50.010**

---

### **Coroner's jurisdiction over remains.**

---

The jurisdiction of bodies of all deceased persons who come to their death suddenly when in apparent good health without medical attendance within the thirty-six hours preceding death; or where the circumstances of death indicate death was caused by unnatural or unlawful means; or where death occurs under suspicious circumstances; or where a coroner's autopsy or postmortem or coroner's inquest is to be held; or where death results from unknown or obscure causes, or where death occurs within one year following an accident; or where the death is caused by any violence whatsoever, or where death results from a known or suspected abortion; whether self-induced or otherwise; where death apparently results from drowning, hanging, burns, electrocution, gunshot wounds, stabs or cuts, lightning, starvation, radiation, exposure, alcoholism, narcotics or other addictions, tetanus, strangulations, suffocation or smothering; or where death is due to premature birth or still birth; or where death is due to a violent contagious disease or suspected contagious disease which may be a public health hazard; or where death results from alleged rape, carnal knowledge or sodomy, where death occurs in a jail or prison; where a body is found dead or is not claimed by relatives or friends, is hereby vested in the county coroner or medical examiner, which bodies may be removed and placed in the morgue under such rules as are adopted by the coroner or medical examiner with the approval of the county commissioners, having jurisdiction, providing therein how the bodies shall be brought to and cared for at the morgue and held for the proper identification where necessary.

# Thurston County Coroner Cases

---

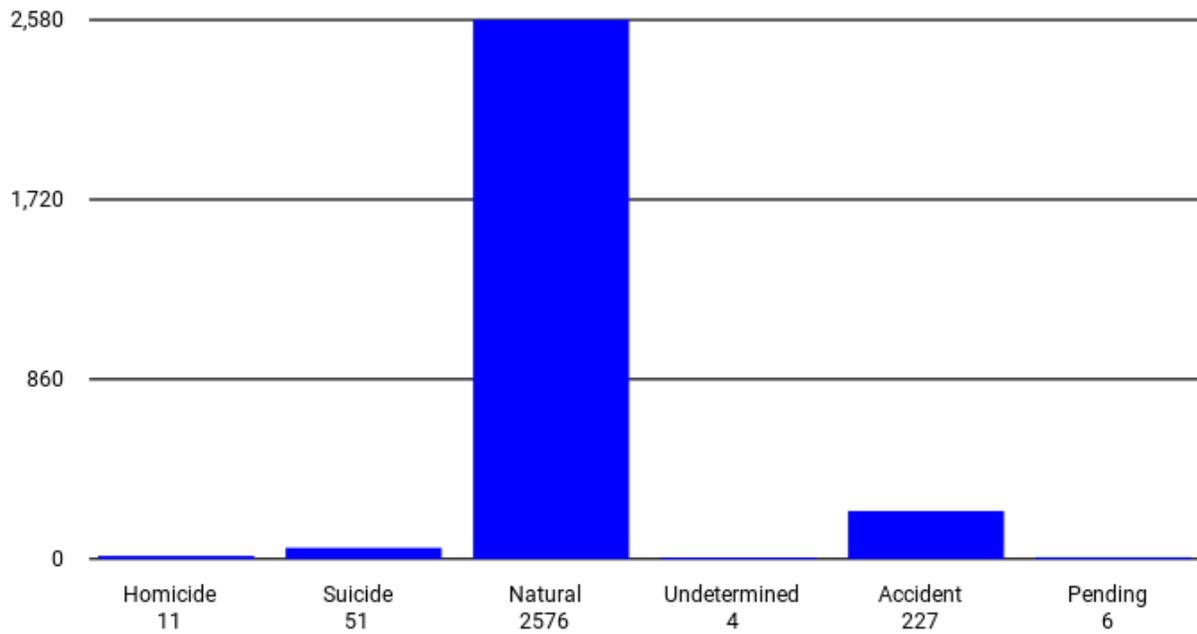

|   |         |
|---|---------|
| 2024 Population (estimated)                         | 302,912 |
| Deaths Reported to the Coroner                      | 2877    |
| Number of jurisdiction assumed deaths               | 461     |
| Number of jurisdiction declined deaths              | 2417    |
| Number of scene responses                           | 364     |
