Horticultural Traits

- **Growth habit**: Type III bearer similar to cv Golden Delicious; medium vigor
- **Bloom timing**: Blooms at cv Gala timing; bloom period around 15 days
- **Disease/disorder sensitivity**: Moderately susceptible to mildew and sunburn; not prone to bitter pit or stem bowl cracking
- **Harvest timing**: Fruit matures in cv Golden Delicious season, in one or two picks, not prone to pre-harvest drop
- **Fruit**: Bicolored symmetrical fruit with pink/red blush (50-70%), colors well if exposed; yellow background, size small to medium; narrow size range with 80-85% of fruit within four classes

Postharvest Performance

- **Handling characteristics**: Generally high packout; not sensitive to bruising, handles well on commercial packing line; waxes to medium high gloss
- **Storage potential**: 9 months regular atmosphere storage; 12 months-controlled atmosphere (1% carbon dioxide, 2% oxygen) with 1-MCP
- **Storage disorders**: Low incidence of soft scald & lenticel breakdown
- **Eating quality**: Balanced sweet/tart flavor, firm, crisp and juicy; maintains fruit flavor and firmness throughout storage; flesh does not brown easily, long shelf-life

Parentage: Honeycrisp × Cripps Pink
