

Signature H3340

The Perfect Fusion of Performance, Precision, and Versatility

The Signature Series UV Hybrid Printer is the ultimate solution for professionals who demand excellence, delivering the power to print with precision and style across both rigid and flexible materials. From sign and display, POP, commercial print, packaging, fine art, and decor markets, the Signature offers hybrid flexibility and unlimited possibilities with ultra-sharp resolution and vibrant colors. Built on a rugged industrial design and enhanced with smart automation, it ensures nonstop, high-efficiency production that is reliable, durable, and always ready to perform. More than just a printer, the Signature Series is your creative partner, helping you bring bold ideas to life and leave a lasting mark, one powerful print at a time.

With a maximum print width of 130 inches, speeds up to 3768 square feet per hour, and support for white, varnish, neon, and light process colors beyond CMYK, the Signature Series delivers the performance needed for demanding production environments. Its hybrid design handles both roll and rigid media up to 2 inches thick, making it as versatile as it is powerful.

Precision in Every Drop - 5 Picoliters

The ultra-fine 5 pL droplet size delivers sharper details, smoother gradients, and vibrant colors while optimizing ink distribution for enhanced efficiency.

Uninterrupted Workflow-Powered by Continuous Printing

Thanks to its Continuous Printing capability, the Signature Series operates seamlessly across 6 different zones. The machine never stops during printing, minimizing downtime and maximizing productivity.

Exceptional Resolution - 2400 dpi Print Quality

With a print resolution of 2400 dpi, the Signature Series delivers stunningly sharp and vibrant colors, including on rigid surfaces. Every detail is captured with precision, setting a new standard in high-quality printing.

Tailored to your Needs - 83 and 130 inch Options

Two Sizes available to match different production requirements. The 83 inch width is ideal for compact spaces while the 130 inch model delivers maximum efficiency.
