VitalCDM

The New Standard in CDM Management

Dana Geddes, Product Manager
Dawn Richason, Product Manager
October 17, 2019

Session Topics

- How is VitalCDM different from other CDM products?
- Is there some functionality within VitalCDM that I am not taking full advantage of?

The Challenge

Legacy chargemaster solutions can't handle complex and very large dynamic data files

That's the reason hospitals are challenged with keeping the CDM file up to date with visibility across departments

The New Standard

This was the motivation to build a solution designed to scale and accommodate all of the data needed.

When your mid-revenue cycle personnel work from a single platform, their productivity increases, errors decrease, and you have more time to take action on... everything else.

How is VitalCDM different from other products?

Data, Data, Data

- Data that can be imported into VitalCDM
 - No restrictions on amount or type of data
 - ✓ Revenue and usage files
 - ✓ Files that augment the CDM file (Pharmacy, Supplies, Willow, Radiant, Optime, Scuba, Stork, ASAP, Beaker, Lawson)
 - ✓ Crosswalk files
 - ✓ Payer fee schedules
- *VitalView module is required to link all data into a single view

MERGE DEFINITIONS

Merge Defs – What and Why?

- Displays in the grid as columns along side CDM line item data
- All key identifier fields must be included in the merge file so that line item matching can occur
- Is a 1:1 relationship
- Other data from other systems that need to be ‘joined’ to the CDM file
 - Fee schedules
 - Revenue and Usage files
 - Cost data files
 - NDC information (if not on shell records) – allows for Pharmacy analysis

Merge Definition added to CDM File

VITALVIEW TABS

VitalView Tabs – What and Why?

- Imported as separate file data
- There must be a number in the file that matches to the CDM line item
- Is a 1:Many relationship
- User wants to select a single CDM line item and see all of the different data elements linked to that one line item

Examples of VitalViewTabs

- Preference Lists
- Soft coded items (i.e. CPT/HCPCS codes)
- Pharmacy file data
- Pharmacy Formulary
- Supply file data
- Fee Schedules
- Order Entry Data
- Linked chargeable items
- Linked Professional codes if the files are separated but have linking value

Defining Crosswalk for VitalView Tabs

The screenshot displays the 'South Tab Defs' window in the VitalView application. The window contains a table with two columns: 'Definition Name' and 'Tab Title'. A 'New South Tab Definition' button is located at the top left of the table. A 'New South Tab Def' dialog box is open in the foreground, allowing users to define a new tab. The dialog box includes fields for 'Definition Name', 'Tab Title', 'File to Display in Main Grid View', 'File to Display in South Panel', and 'Description'. The 'File to Display' fields have dropdown menus with the option 'Select a CDM File'. The 'Description' field is a text area. 'Save' and 'Cancel' buttons are at the bottom of the dialog box. In the background, the 'South Tab Defs' table lists various definitions, including 'Alt CPT/HCPCS', 'Alt Rev Codes', 'Pharmacy', 'rpt grp 15 HB items', 'rpt grp 19 hcpr items', 'item Rpt grp 15', 'Item Rpt Grp 19', 'Linked Chargeables ...', 'Medication Pref List', 'Preference List -Syst...', 'Preference List - User', and 'Supply'.

CROSSWALK FILES

Crosswalk File Functionality

- Create a look-up table to populate fields in designated fields
- Reduces keystrokes
- A file is imported as a 'Crosswalk' file type
- The file is linked to the CDM using the 'Field Mapper'
- Fields within both files are linked together
- More than one crosswalk file can be linked to a CDM file

CDM Fields to Populate

The screenshot displays the VitalWare VitalCDM interface. At the top, there's a navigation bar with 'Products' and 'VitalWare' dropdowns. Below it, a tabbed interface shows 'Main Dashboard', 'X VitalAdmin', and 'VitalCDM'. The 'VitalCDM' tab is active, showing a sub-menu with 'Tools', 'History', 'Views', and 'Schedule Export'. Below this, there's a 'CDM' section with 'Requests', 'Analysis Summary', and 'Dashboard' tabs. The 'Requests' tab is selected, showing a table of medical procedures. The table has columns for 'Procedure Code', 'Procedure Description', 'Default Re...', 'Default CP...', 'Unit Price', 'GL Code', 'Legend 1', 'Legend Date 1', 'Legend Price 1', 'Legend Unit 1', 'Myth 2', 'Myth Date 2', 'Myth Price 2', and 'Myth Unit'. The 'GL Code' column is highlighted in yellow, and the 'Legend 1', 'Legend Date 1', 'Legend Price 1', and 'Legend Unit 1' columns are highlighted in red. The table lists 20 procedures, including 'HC COMPLETE CBC W/AUTO DIFF WBC', 'HC MAPS EXC TR-EXT MAL+MARG 3.1-4 CM', 'HC SERUM PROTEIN ELECTROPHORESIS', etc. At the bottom, there's a pagination bar showing 'Page 1 of 563' and a status bar indicating 'Displaying 1 - 50 of 28104'.

Designate Field to Search in Crosswalk File

The screenshot shows the VitalWare X VitalAdmin interface. A table of groups is displayed, with columns: Flags, Entity, Group ID, Map Type, Group, Description, Created, Creator, CDMs in Set, Fields, and Mapped Fi... The table contains 8 rows of data. A 'New Crosswalk Map' dialog box is open, showing a dropdown for 'CDM to search:' with 'B CrossWalk Legend' selected. The 'Field to search:' dropdown is highlighted, and 'GL Code (General Ledger (GL) Code)' is selected. The dialog box also lists other fields: Legend 1 (Text), Legend Date 1 (Date), Legend Price 1 (Price (decimal)), and Legend Unit 1 (Integer (number no decimals)). The 'Save' and 'Cancel' buttons are at the bottom of the dialog box.

Map Fields Between Crosswalk and CDM

The screenshot shows the VitalWare VitalAdmin interface. The top navigation bar includes the VitalWare logo, a 'Products' dropdown, and user information for 'VitalWare' and 'danageddes'. The main dashboard has tabs for 'Main Dashboard', 'X VitalAdmin', and 'VitalCDM'. The 'X VitalAdmin' tab is active, showing a 'Groups' section with 'Corporate Standard Files' and a 'Map: Secondary Legend' window.

The 'Map: Secondary Legend' window has a 'Fields' tab. A 'New Field' button is visible. The 'Field Type' is set to 'General Ledger (GL) Code'. The search results are empty, showing 'No Results Found...'. The left sidebar shows a tree view of fields, with a red box highlighting the 'Legend - (Text)' section and its sub-items:

- Search field that match - (General Ledger (GL) Code)
 - GL Code (destination) (B Secondary CDM)
 - GL Code (source) (B CrossWalk Legend)
- Legend - (Text)
 - Legend 1 (destination) (B Secondary CDM)
 - Legend 1 (source) (B CrossWalk Legend)
- Legend Date - (Date)
 - Legend Date 1 (destination) (B Secondary CDM)
 - Legend Date 1 (source) (B CrossWalk Legend)
- Legend Price - (Price (decimal))
 - Legend Price 1 (destination) (B Secondary CDM)
 - Legend Price 1 (source) (B CrossWalk Legend)
- Legend Unit - (Integer (number no decimals))
 - Legend Unit 1 (destination) (B Secondary CDM)
 - Legend Unit 1 (source) (B CrossWalk Legend)

The bottom of the window shows a pagination bar with 'Page 1 of 1' and a 'No data to display' message.

Data Entry Populates CDM fields Using Lookup

The screenshot displays the VitalWare VitalCDM interface. The main table lists various procedure codes and their descriptions. A red box highlights the 'GL Code', 'Legend 1', 'Legend Date 1', 'Legend Price 1', and 'Legend Unit 1' columns for the first row. The 'Detail' panel on the right shows the 'Edit' tab selected, with fields for 'GL Code (3/10)', 'Legend 1 (5/100)', 'Legend Date 1', 'Legend Price 1', and 'Legend Unit 1'. The 'GL Code' field is highlighted in yellow, and the 'Legend 1' field is highlighted in red. The 'Legend 1' field contains the text 'Yeren'. The 'Legend Date 1' field contains '04/30/2015'. The 'Legend Price 1' field contains '900'. The 'Legend Unit 1' field contains '3'. The 'Myth 2' field contains 'Ogopogp'. The 'Myth Date 2' field contains '02/01/1901'. The 'Myth Price 2' field contains '299'. The 'Myth Unit 2' field contains '22'. The 'Comment' field is empty. The 'Save' and 'Cancel' buttons are at the bottom right of the panel.

PAYER FEE SCHEDULES AND ANALYSIS

Payer File Analysis

- Ability to analyze a charge amount in the CDM file against a payer's fee schedule amount to determine if the charge is above or below the amount for the specific payer
- Provides visibility to others within the organization that need to assess the pricing structure of the CDM file
- Provides the ability to compare different payer fee schedules against one another
- Payer fee schedules can be updated at any point in time just like CDM and revenue and usage data
- Matches on CPT/HCPCS code between the CDM file and Payer Fee schedule file

PRICING DATA AND PRICING REPORTS

Why use the Pricing Reports

- Updated every quarter
- Included in VitalCDM at no additional cost
- Can run the reports as often as needed
- Less expensive than a consulting firm providing the data and analysis
- SAF data is 6 months old
 - 100% of paid Medicare claims

Available Data

- Medicare APC rates
- Medicare Fee Schedule amounts
- SAF data
 - Peer hospitals – up to 20 peers per analysis – weighted peer average
 - Bed Size
 - Urban vs. Rural
 - Percentile (10th, 25th, 50th, 75th, 90th)
 - Teaching vs. Non-Teaching
 - CBSA (in VitalKnowledge)

SCHEDULED REPORTS

What you need to know about scheduled reports

- Any 'Saved View' (aka ad hoc customized report) can be scheduled to send on a regular basis
- Anyone can receive a report
- Can be sent on a daily, weekly, or monthly timeframe
- Scheduled reports can be updated at any time for additional filters, columns, etc.

Customize and Save a Report

The screenshot displays the VitalWare VitalCDM application interface. At the top, there are tabs for 'Main Dashboard', 'X VitalAdmin', and 'VitalCDM'. Below these are navigation buttons: 'Tools', 'History', 'Views', 'Schedule Export', and 'View Corporate'. The main content area shows a table with columns for 'Proc Description', 'Default CPT', 'Price', 'Weighted Peer ...', 'Variance', 'Variance Pct', and several 'PROVIDE...' columns, followed by columns for 'SALEM H...', 'SALEM H...', 'TUALITY CO', 'TUALITY ...', 'OREGON ...', and 'OREGC'. A 'Save View' dialog box is open in the center, with a red rectangle highlighting the options: 'Save Search Filters', 'Save Sort Criteria', 'Save Report Column Model Default', 'Set as Default Search Selections', and 'Make Public'. The 'View Name' field is set to 'Pricing Report - Portland, OR'. At the bottom of the dialog are 'Save New', 'Replace', and 'Cancel' buttons. The bottom of the application window shows a pagination bar with 'Page 2 of 11' and a status bar indicating 'Displaying 51 - 100 of 546'.

Save View Dialog Options:

- View Name: Pricing Report - Portland, OR
- Save Search Filters: ☒
- Save Sort Criteria: ☒
- Save Report Column Model Default: ☒
- Set as Default Search Selections: ☐
- Make Public: ☒

Buttons: Save New, Replace, Cancel

Access a Report

The screenshot displays the VitalWare VitalCDM web application interface. The top navigation bar includes the VitalWare logo, a 'Products' dropdown, and tabs for 'Main Dashboard', 'X VitalAdmin', and 'VitalCDM'. Below this is a secondary navigation bar with 'Tools', 'History', 'Views' (highlighted with a yellow box and a mouse cursor), 'Schedule Export', and 'View Corporate'. The 'Views' dropdown menu is open, showing a list of reports. The main content area is divided into two panes. The left pane shows a table of procedure descriptions with columns for 'Proc Description', 'Default CPT', 'Price', and 'Weighted ...'. The right pane shows a list of reports with columns for 'SALEM H...', 'SALEM H...', 'TUALITY CO', and 'TUA'. The bottom of the interface features a pagination bar indicating 'Page 1 of 11'.

RECONCILIATION

Why use Reconciliation?

- Review changes/additions to the CDM BEFORE they are applied
- Prevent line item data from coming into the system if it shouldn't and apply ONLY good data
- Gives total control to the user while still using an automated import process
- Clearly identifies variance between PAS data and Vitalware data to assist with process control

PRICING TRANSPARENCY

HOSPITAL PRICE INDEX

Challenge

New proposed rules for 2020 may require hospitals to post an easy to search list of at least 300 shoppable services, including 70 CMS-selected shoppable services and 230 hospital-selected shoppable services, with the charge that reflects all costs associated with the procedure so the patient has a true understanding of the total charge for the procedure

Solution

Have a tool that can easily identify the 70 services CMS has proposed be included in each hospital's list of 300 shoppable services, and provide a way to maintain and display the total costs for these procedures in an easy to search list

What Does HPI Include?

- **Administration area** to create a list 300 shoppable services that CMS has proposed be posted
- **Research tools** that include your average claim amount for procedures listed in the SAF data published within the last 12 months by CMS
- **Ability to post a low price and a high price** to allow for differences that exist between specific patients and physicians
- **Patient Friendly descriptions** developed and maintained by Vitalware
- **Patient view (URL)** that can be imbedded on the hospital website listing both a list of 300 shoppable services along with the CDM file in it's entirety
- **Ability to control** what and when items get posted to the URL

Patient Friendly Chargemaster

The screenshot displays the VitalWare Patient Friendly Chargemaster interface. On the left, a search sidebar contains criteria filters: VitalWare, Somewhere CDM, Only Active Items, Select ACK Status, Select Department(s), Somewhere Hospital, All CDM Reports, and Patient Friendly Chargemaster. Below these are Basic and Advanced filter options. The main area shows a table of items with columns: Item ID, Cost Center, Departme..., CMS 70 IND, VW Billing Description, CPT/HCPCS, *Revenue ..., Price, and TOTAL YT... A context menu is open over the row with Item ID 575369, offering actions: Change 1 item, Add 1 item, Deactivate 1 item..., Exclude 1 item from Current Report..., Exclude 1 item from All Reports..., and Copy Item to HPI Administration Panel. The bottom of the interface shows pagination (Page 1 of 172) and a status bar (Displaying 1 - 50 of 8595).
