Geocache Description:

Well, thanks to our nearby Ward Transformer company, Crabtree Lake and the outflowing Crabtree Creek is now polluted with PCB's. So, Don't Eat the Fish!!! Maybe someday the Superfund will clean it up or more than likely Mother Nature will have to do it for us. Hopefully someday we can eat fish from this area again. You can catch and release. Thank goodness, we can still geocache. Short walk off a nearby social trail close to a fishing spot on the creek. See the big pipe.

Micro. Bring your own pen.

No additional hints.
