

Scout Saturdays for the 2022—2023

Blue Jay Point County Park provides an ideal setting for scouts to fulfill requirements for environmental and nature-oriented badges. Our trails, open areas, lake front, study pond, garden area and classrooms encourage scouting groups to discover the world of nature through observation and investigation while learning the value of preservation and conservation. Blue Jay staff members can provide informational sessions and guided hikes for scout groups.

Monthly themed programs especially for scout groups are available on **selected Saturdays**. Some programs are “requirement oriented” while others are “background oriented” enabling scouts to continue work on their own. Call to find out details for your particular group! Additional service projects and learning opportunities under leader guidance are available. These programs are for scout groups with **up to 15 scouts** (not including scout leaders/chaperones).

Date	Intended Scouts	Targeted Badge
