

# WHERE SMARTER FINANCIAL FUTURES BEGIN

## SOPHOMORES

### SEMESTER 1

#### Discovering You – Designing Your Path Forward

#### GOAL

Help students explore who they are, what motivates them, and how they can align their unique strengths and interests with a meaningful life and career paths.

## LESSON

## WHAT STUDENTS LEARN

|   |                                                  |                                                                                                                               |
|---|--------------------------------------------------|-------------------------------------------------------------------------------------------------------------------------------|
| 1 | What Makes You, You?                             | Identify personal values, traits, and preferences to better understand how they influence decisions and future direction.     |
| 2 | Finding Your Strengths: Your Natural Superpowers | Recognize personal strengths and how they show up and can be applied in everyday life to guide future choices.                |
| 3 | Interests & Curiosities: What Draws You In?      | Identify personal interest patterns and connect them to potential career and education pathways.                              |
| 4 | What Sparks Your Energy                          | Identify preferred work environments and understand how energy and task preferences influence performance and future choices. |
| 5 | What Success Means to You                        | Define personal success by aligning values, strengths, interests, and environment preferences to guide future decisions.      |
| 6 | Career Exploration Lab                           | Evaluate potential careers based on strengths, values, interests, and work style to identify potential future directions.     |
| 7 | Your Becoming: Setting Goals That Matter         | Set meaningful goals aligned to their identity and create a clear action plan to begin working toward their future selves.    |
| 8 | Who I Am and Where I'm Headed                    | Combine self-discovery insights into a meaningful profile that communicates who they are and where they are headed.           |

# JUNIORS

## SEMESTER 1

### Core Financial Foundations

#### GOAL

Build core habits, mindset, and understanding of money.

## LESSON

## WHAT STUDENTS LEARN

|   |                                            |                                                                                                                          |
|---|--------------------------------------------|--------------------------------------------------------------------------------------------------------------------------|
| 1 | Your Money Mindset                         | Identify how personal beliefs about money are formed and how they influence financial decisions and future outcomes.     |
| 2 | Building Good Habits                       | Learn how financial habits are formed and create a simple plan to build or change habits that support long-term success. |
| 3 | Budgeting Basics:<br>Your Plan, Your Power | Create and apply a simple budget to understand how money is managed and how spending decisions impact financial goals.   |
| 4 | The Banking System                         | Learn how to choose and use banking tools to manage, protect, and grow money while avoiding common fees and risks.       |
| 5 | Saving and Emergency Funds                 | Learn how a savings plan provides freedom, reduces stress, and prepares for both opportunities and emergencies.          |
| 6 | Credit Basics                              | Explain how credit works and how financial behaviors impact future opportunities.                                        |
| 7 | Dangers of Debt                            | Analyze how everyday financial choices can lead to debt and apply strategies to avoid long-term consequences.            |
| 8 | The Power of Compound Interest             | See how even small contributions today can grow into meaningful financial advantages in the future.                      |

# JUNIORS

## SEMESTER 2

### Beyond the Basics: Building Your Financial Independence

#### GOAL

Prepare them for real-world financial independence.

## LESSON

## WHAT STUDENTS LEARN

|   |                                                        |                                                                                                                                              |
|---|--------------------------------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------|
| 1 | Earning Money & Understanding Paychecks                | Analyze different ways to earn income and understand how paychecks, taxes, and income types impact take-home pay.                            |
| 2 | Managing Credit Cards Wisely                           | Learn how credit cards work and apply responsible habits to avoid debt and protect future financial opportunities.                           |
| 3 | Introduction to Investing                              | Build a foundational understanding of investing and recognize why starting early is one of the most powerful steps toward financial freedom. |
| 4 | Future Funding                                         | Compare future funding options and understand how early saving can create greater financial freedom and flexibility.                         |
| 5 | Avoiding Scams and Identity Theft                      | Recognize common scams and identity theft risks and apply strategies to protect personal and financial information.                          |
| 6 | Understanding Insurance                                | Evaluate financial risks and explain how different types of insurance help protect against unexpected losses.                                |
| 7 | The Summer Before Senior Year: Money Moves That Matter | Prepare for senior year by identifying key financial decisions and actions that create more options and less stress.                         |
| 8 | Setting Up for the Future                              | Develop a personal roadmap that connects financial habits, goals, and decisions to long-term success.                                        |

# SENIORS

## SEMESTER 1

### College Money 101: Paying for Your Education the Smart Way

#### GOAL

Empower students to make financially sound decisions about college or trade schools and minimize long-term debt.

## LESSON

## WHAT STUDENTS LEARN

|   |                                                            |                                                                                                                                        |
|---|------------------------------------------------------------|----------------------------------------------------------------------------------------------------------------------------------------|
| 1 | The Real Cost of Education                                 | Analyze the full cost of education beyond tuition and understand how financial tradeoffs impact different school choices.              |
| 2 | Balancing Dreams and Dollars: Finding the Best Fit for You | Evaluate education options by aligning personal priorities with financial realities to make informed decisions.                        |
| 3 | Scholarship & Grant Strategies                             | Identify and apply strategies to find, evaluate, and secure scholarships and grants to reduce education costs.                         |
| 4 | FAFSA & Financial Aid                                      | Learn how to complete the FAFSA and interpret financial aid options to access funding for education.                                   |
| 5 | Understanding Student Loans                                | Analyze how student loans work and apply strategies to borrow wisely and minimize long-term financial impact.                          |
| 6 | Minimizing Debt                                            | Apply practical strategies to reduce education-related debt and understand how everyday decisions impact long-term financial outcomes. |
| 7 | Evaluating Offers and Making the Final Choice              | Compare and evaluate financial aid offers to identify true cost and choose the best-fit option based on goals and financial impact.    |
| 8 | Paying It Back                                             | Learn how student loan repayment works and plan for manageable payments that support long-term financial stability.                    |
