

# Covid Vaccination or Job Loss

Pastor Vern Peltz

---

## Basic principles

---

#1 - You must make every effort to not give way to Fear.

#2 - I can't tell you to get the vaccination, or not to get it.

#3 - You need to hear from God.

#4 - Whether you have gotten the vaccination, or not:

- You are welcome at W/L.
- You will not be judged or condemned for your choice.

# Basic principles

#5 - I have no intention of getting it, unless I'm forced.....

- Locked out of society. (Then it's questionable.....)

A. Why??

1. There has been way too much what looks like media collusion, government corruption, and lies - for me to trust anything about this vaccine.

2. It's an experimental drug.

3. There are way too many informed, scientists and doctors who are saying it could have very bad long term affects on our bodies.

4. I don't live by fear, I try to live by following the Spirit

## Revelation 13:11-17 (NIV)

[11] Then I saw another beast, coming out of the earth. He had two horns like a lamb, but he spoke like a dragon. [12] He exercised all the authority of the first beast on his behalf, and made the earth and its inhabitants worship the first beast, whose fatal wound had been healed. [13] And he performed great and miraculous signs, even causing fire to come down from heaven to earth in full view of men.

# Revelation 13:11-17 (NIV)

[14] Because of the signs he was given power to do on behalf of the first beast, he deceived the inhabitants of the earth. He ordered them to set up an image in honor of the beast who was wounded by the sword and yet lived. [15] He was given power to give breath to the image of the first beast, so that it could speak and cause all who refused to worship the image to be killed.

# Revelation 13:11-17 (NIV)

[16] He also forced everyone, small and great, rich and poor, free and slave, to receive a mark on his right hand or on his forehead, [17] so that no one could buy or sell unless he had the mark, which is the name of the beast or the number of his name.

## CDC Director: Vaccines No Longer Prevent You From Spreading COVID

Fully vaccinated people who get a COVID-19 "breakthrough" infection can spread the virus to others even if they are not symptomatic, Centers for Disease Control Director Rochelle Walensky told CNN on Thursday.

She warned that an autumn/winter surge in the COVID "Delta" variant could again see hundreds of thousands of cases per day.

### CDC just admitted that 74% of those infected in Massachusetts covid outbreak were "fully vaccinated"

Tuesday, August 03, 2021 by: [Ethan Huff](#)

([Natural News](#)) The U.S. Centers for Disease Control and Prevention (CDC) has released a new [Morbidity and Mortality Weekly Report](#) showing that three out of every four people infected during the recent Wuhan coronavirus (Covid-19) "delta variant" outbreak in Massachusetts had already been "fully vaccinated" with a Fauci Flu "vaccine."

Of the 469 "cases" of the Chinese Virus that were [identified in Barnstable County](#), 346, or 74 percent, occurred in "fully vaccinated persons ... who had completed a 2-dose course of mRNA vaccine [Pfizer-BioNTech or Moderna] or had received a single dose of Janssen [Johnson & Johnson] vaccine [at least] 14 days before exposure."

According to the CDC genomic sequencing of specimens collected from 133 patients revealed the presence of B.1.617.2, which the government is calling "delta" even though it refuses to explain how and when the testing protocol for "delta" was developed.

"Overall, 274 (79%) vaccinated patients with breakthrough infection were symptomatic," the CDC says about the outbreak. "Among five COVID-19 patients who were hospitalized, four were fully vaccinated; no deaths were reported."

## CDC admits it used fraudulent PCR testing to identify “delta” cases

The CDC did reveal that it used fraudulent real-time reverse transcription-polymerase chain reaction (RT-PCR) cycle threshold (Ct) values to come up with its positive diagnoses for the “delta” patients it identified.

Not only are PCR tests fraudulent, generating false positives especially when cranked up high as they were all throughout 2020, but they were also designed and calibrated to [identify common influenza](#), not the Chinese Virus.

What many people are testing “positive” for, in all reality, is just the ordinary seasonal flu. This is why there was no flu season in 2020.....

Even so, the government continues to fearmonger about the “delta variant,” blaming the unvaccinated for its continued spread among the vaccinated.

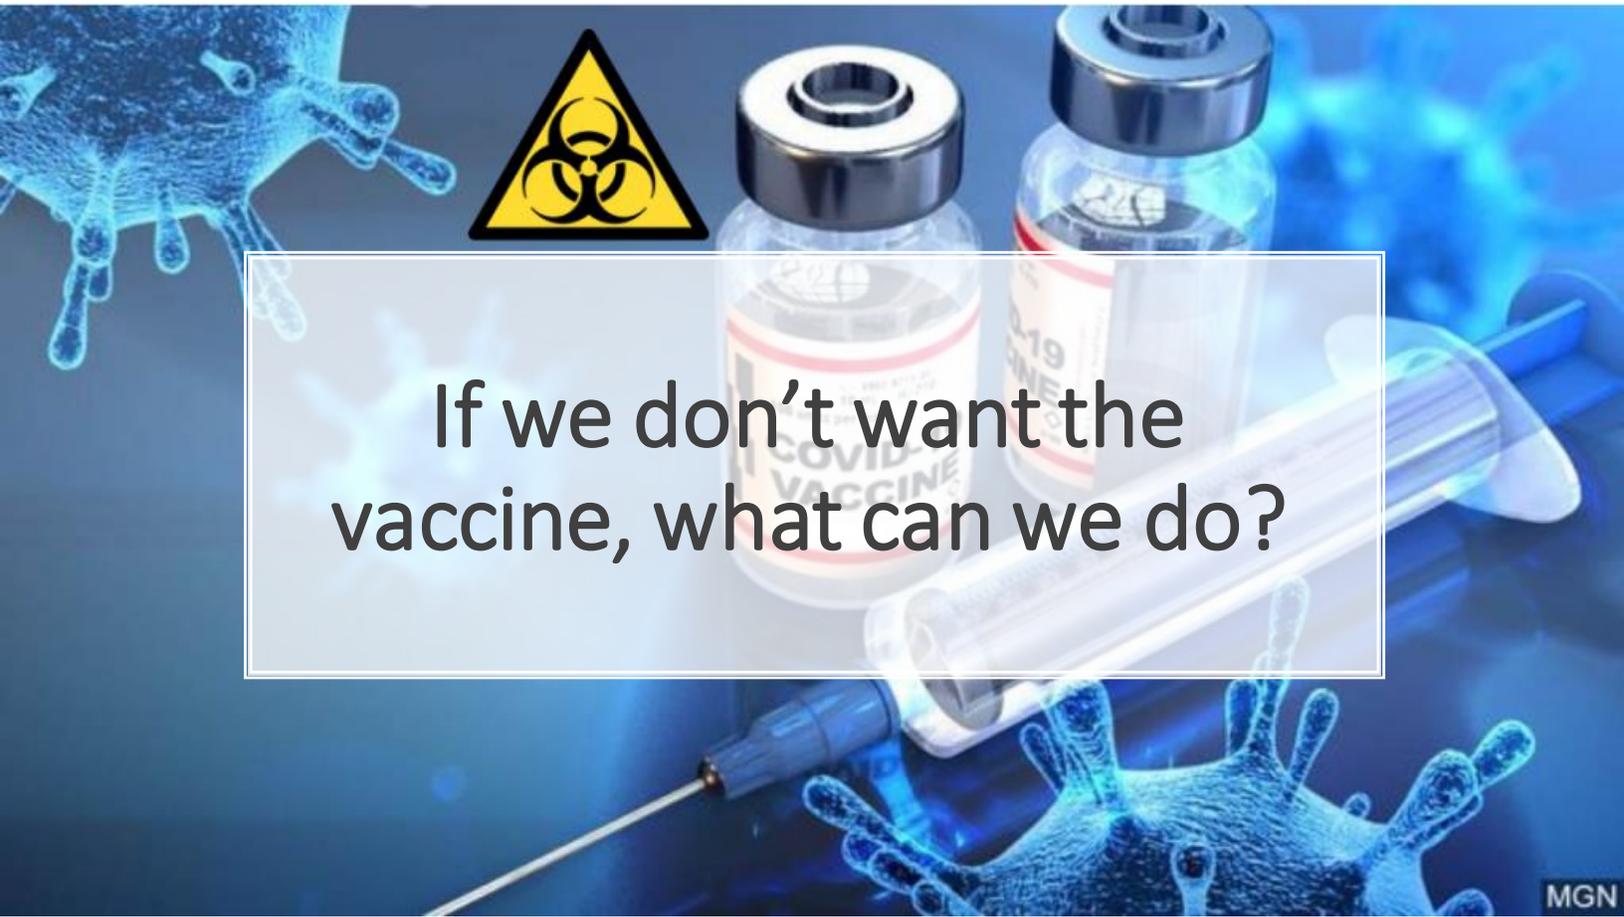

## Majority of Hospitalized COVID-19 Patients at Hospital in Israel Are Fully Vaccinated: Doctor

By [Meiling Lee](#) August 7, 2021 Updated: August 7, 2021

An Israeli doctor says that the majority of COVID-19 patients hospitalized at his hospital are fully vaccinated and those with severe illness have also been vaccinated.

Talking with Channel 13 TV News on August 5, Dr. Kobi Haviv, medical director of Herzog Hospital in Jerusalem [said](#) that “85 to 90 percent of the hospitalizations are in fully vaccinated people,” and “95 percent of the severe patients are vaccinated.” Herzog Hospital specializes in nursing care for the elderly.

Haviv said the rising cases of vaccinated people getting COVID-19, a disease caused by the [CCP \(Chinese Communist Party\) virus](#) is because “the effectiveness of the vaccine is waning.”

If we don't want the vaccine, what can we do?

If we don't want the vaccine, what can we do?

- A. Say NO. (To your employer, etc.)
  - 1. Form as large of a group as you can.

If we don't  
want the  
vaccine, what  
can we do?

- A. Say NO. (To your employer, etc.)
  
- B. Peacefully Protest

If we don't  
want the  
vaccine, what  
can we do?

- A. Say NO. (To your employer, etc.)
- B. Peacefully Protest
- C. Lawsuits.
  - 1. HIPPA Law
  
  - 2. Again: form a group / join a group...

If we don't want the vaccine, what can we do?

- A. Say NO. (To your employer, etc.)
- B. Peacefully Protest
- C. Lawsuits
- D. ABSOLUTELY: We cannot be silent about what's happening. We must resist & fight it.

Country-by-country data on mortality

## The case fatality rate

### Case fatality rate of COVID-19

The case fatality rate (CFR) is the ratio between confirmed deaths and confirmed cases. The CFR can be a poor measure of the mortality risk of the disease. We explain this in detail at [OurWorldInData.org/mortality-risk-covid](https://OurWorldInData.org/mortality-risk-covid)

#### Related chart:

How do the total number of confirmed deaths and cases compare? See them plotted against each other.

**Total confirmed deaths vs. cases [scatterplot]** →

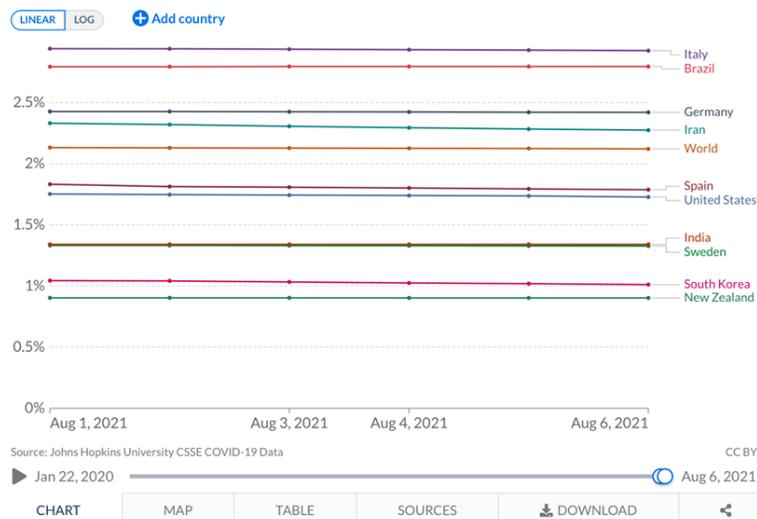

The case fatality rate is simply the ratio of the two metrics shown in the chart above.

The case fatality rate is the number of confirmed deaths divided by the number of confirmed cases.
