about our brand personality
Our purpose

To empower teams with a focused and clear workflow management platform

We aim to enable individuals and teams to focus on their priorities, collaborate and accomplish their goals. Our brand needs to reflect the realities that modern teams face every day, which means sharpening their ideas, converting them into actionable tasks, executing them, and gaining valuable insight and data along the way. Additionally, we hope to inspire remarkable achievement and optimize work/life balance.

We value time and healthy relationships.

Logo misuse

For a long term health and maturity of workstreams.ai brand and products, we appreciate everyone's effort for keeping a consistent use of our logo, respecting the building grid. Below, there are some examples of logo misuse. In case of emergency, contact our design team.

- Do not change the placement of the icon or wordmark.
- Do not change the typeface or manipulate the wordmark or the icon.
- Do not add effects like shadows and gradients to the logo.
- Do not rotate any part of the logo.
- Do not change the colors of the icon or wordmark.
- Do not distort or warp the logo in any way.
- Do not use the wordmark without the icon.
- Do not reflect the icon.
Logo misuse

Considering background usage.

- Do not place the logo in an inappropriate shape without enough space.
- Respect the light and dark theme variations and proper contrast ratio.
- Be careful when placing the logo on colored backgrounds. Check if there’s enough contrast and the background color is part of the brand palette.
- When placing the logo on images, be sure to use the right light or dark mode and look for clean areas of the image.

typography
**Primary Typeface**

Inter is a typeface carefully crafted & designed for computer screens and features a tall x-height to aid in readability of mixed-case and lower-case text.

Besides the logo wordmark, Inter variations are used for subtitles, body, captions, overlines as any other UI situation is needed. We aim to keep a more neutral and clean design.

Auxiliary Typeface

Its humanist aspects of simple letterforms and open apertures keep it crisp and legible, while its geometric approach of rounded letters with partially-straightened sides delivers a friendly but precise tone.

For marketing materials, like website, social media or video production, Encode Sans family is the best choice for headlines.

imagery
Photography

As our logotype is very colorful we are going to use calm, medium contrasted black and white photography. This will assure well balanced compositions.
Textures

We created a brush pack and background textures that allows us to bring more life and even more human signs to the brand imagery.
Gradients

Sometimes, when we need a more “virtual” digital atmosphere, we can use gradients as background. They shall be very diffuse, with brand colors only and a subtle grain texture.
Illustrations are cool for adding some joy to the imagery or sometimes to represent abstract concepts, mostly when we need some iconic representation of a theme. Workstreams style is a collage of b&w photography, UI elements, brush strokes and flat shapes with an elegant grain texture.
