Personal learnings

-Nitesh Sharma

Be confident in my work,
adopt only the good qualities
of others, stay positive, work
with focus, and continuously
learn new things. Life is full of
new experiences, whether
good or bad, and we can
learn a new lesson from every
moment.

-Kiranjeet Kaur

Without health, wealth
cannot be used, strategy
cannot be executed, and
power cannot be sustained.

-Sudhir Kumar

This year I traveled less than last year,
but I read good books, learned about
the environment and how it works, and
asked thoughtful questions about what I
observed. Next year, I hope to ask even
more questions and understand many
new things.

-Shashank Shekhar Pandey

I mastered the art of
pretending I have it together.

-Gagandeep Singh

Do not believe what people say;
believe what they do

-Vivek Chaudhary

My biggest lesson from 2025 is the
value of intentional focus. In 2026,
I'm committed to prioritizing my
professional goals and maintaining a
solution-oriented mindset, ensuring
that my energy stays directed toward
growth and positive outcomes.

"If it costs me my Peace of Mind, it's too Expensive—and inflation is already high enough."

-Aishwar Negi

Emotional boundaries are not just meant, when you're hurt. The boundaries must be taken care every moment.

-Sahib Kaur

One key lesson I'm taking into 2026 is to never take health lightly. This year reminded me that no role, responsibility, or location matters more than listening to your body and acting on early signs instead of ignoring them. It also reinforced the importance of having a strong support system and a reliable care network — especially for those of us living away from home. Going forward, I want to be more mindful of my well-being and encourage others to prioritise timely medical attention and self-care, no matter how busy life gets.

-Varun Goswami

This year taught me that excellence is just the glamorous name we give to relentless consistency. The big wins of 2025 weren't built on sudden sparks of genius, but on the willingness to embrace the loop—to draft, delete, and draft again. I've learned that you don't practice until you get it right; you practice until you can't get it wrong.

-Gaby Singh

Truth doesn't always reward you

-Asher

This year taught me the importance of staying adaptable and communicating clearly. Going into 2026, I'm focused on continuous self-improvement and bringing a positive, responsible approach to my work.

-Rob Dillon

Sometimes it's better to be kind than to be right.

-Tenzin Ananda

-Abhay

Eliminate expectations for the
coming year to protect your
peace of mind.

-Mayank Sharma

Not everything needs a
meeting. Some things need
a decision.

-Madhu Chauhan

No act of kindness, no
matter how small, is ever
wasted :)

-Selenia Sharma

Softer with myself, and stronger
with the lessons 2025 taught me.

-Sonam Kainthla

What I'm Taking Into 2026: Clear boundaries
without guilt, Bonds rooted in mutual respect,
Peace over people-pleasing, Growth over
comfort, Alignment over attachment. 2025
taught me who not to carry forward. 2026
will be about walking lighter, wiser, and more
intentional — with people who meet me where
I am, not where I used to be.

-Udita

Many, for example: 1. The line you choose at a toll
plaza will always move slower than the others. 2.
You will open the fridge repeatedly as if new food
might appear. 3. You never realize how loud a
snack is until the floor is silent. 4. No number of
gol-gappe will ever be enough for me! :D

-Sakshi Aneja

2025 was the lesson;
2026 is the application.

-Rahul Dev

Life changes overnight—in October 2025 I
became a girl dad. Sleep became optional, love
turned unlimited, and every responsibility feels
lighter when it's for your daughter. Heading into
2026 with more patience, purpose, and a lot
more Tea & coffee ☕❤

-Jagdeep Marketing

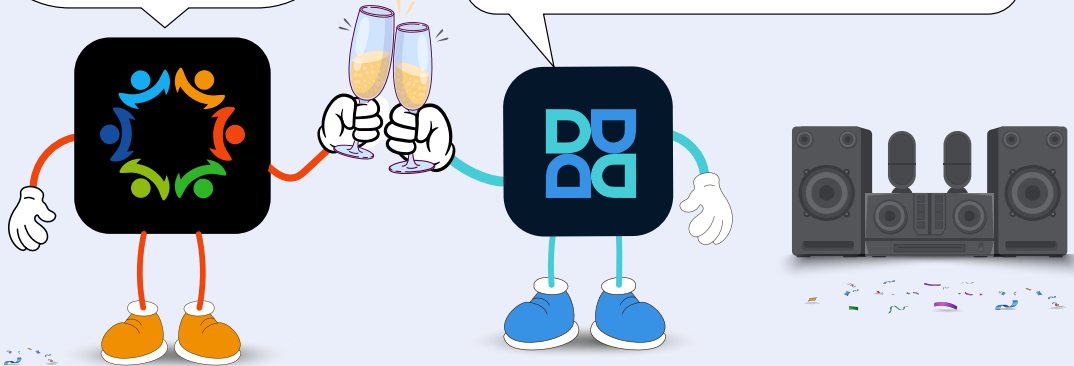

Many things from my colleague and need to
